A number in parentheses () indicates the number of birds observed at a particular location or on a particular date. No number signifies single birds. Place names given in *italic type* are counties. Species requiring review by the Illinois Ornithological Records Committee are **CAPITALIZED AND UNDERLINED**. Some editorial remarks of noteworthy records are **boldfaced**. The sequence of records within species accounts, except for maximum counts, begins in northwest Illinois (Jo Daviess, Carroll and Whiteside counties), proceeds to the east, then continues back and forth across the state in a systematic pattern with the southernmost records at the end. The 2003 DeLorme Illinois Atlas & Gazetteer has been used as a standard for spelling of places names for sites included therein.
