

IOS Listers Corner 2012

Total Counties per Species List - Northern Region

(Top five totals per county - 24 possible counties)

With only 24 counties in the region, it might seem like a more manageable task to find a given species in all of the Northern counties. And the fact that 110 species have been 'closed out' in this region by one or more birders suggests that it is indeed easier than finding a species in all 102 counties in the state. Still, one would be wrong to think this is an easy task for most species. It seems likely that the birders who are currently stuck at 23 counties – which is true for a full 20 species – are well aware of how difficult it can be to find some birds when you need them! Several birders submitted thorough lists for this region for the first time, and we hope to see more submissions next year.

The *Illinois Regional Map* can be accessed from the Listers Corner home page.

"Multiple observers" means that 5+ birders have reported the same total.

(updated 3/11/13; compiled by Joe Lill & Jim Mountjoy)
