President's Message

Dear Members:

This is my last message to you as President. My six years is up. It is time for new leadership and fresh ideas.

Over the 17 years since IOS was founded, birding has flourished in Illinois. It would not surprise me if 10,000 people are active birders in our state today given the U.S. Fish and Wildlife Service's estimate of 41 million active birders nationwide in 2001. Yet our membership has not kept pace. It has fluctuated in a band between 400 and 500 for some years now and is currently 472. Compare this to IBET's 1,500 members or the newcomer Illinois Birders Forum's 465 members.

The intervening years have seen the growth of the internet technologies that have given IBET and the IL Birders Forum their virtually cost-free platforms. The information sharing made possible by these networks has significantly enhanced our birding experience. They do, however, make us re-evaluate our model. If you can find out what is being seen and where through IBET and go on free field trips with your local bird club, why do you need to be a member of IOS?

The answer of course is the *Meadowlark*, our field trips' rare bird focus and to support our scientific and educational mission. Unfortunately the membership revenues are not sufficient to support a strong scientific and educational part to our mission. The identification skills focus at events like the Gull Frolic are good, but we need to develop youth-focused programs to build the next generation of birders. If we are to continue building our scientific and educational programs, we must attract more resources whether that be membership revenues, sponsorships or more volunteers.

We have successfully adapted some of our programming to address the challenges of the internet age, but need to do more. For example, our field trips have attracted strong interest since we started to focus on difficult-to-find species, and our educational events, the Gull Frolic, the Spring Birding Weekend and the habitat-dependent Shorebird Spectacular have become excellent membership draws. Also in planning is an Illinois Young Birders Club.

We have adopted the internet to enhance our offerings and reduce our costs. Overtime our web site has become a better communications tool and we have additional improvements in the planning stage such as a Members Only section with premium content.

There is a lot to be proud of. Thanks must go to our energetic board and the many others who support our activities. Today we have more members active in running our programs than ever before and we continue to innovate to make our offerings more attractive. I am confident that this will continue and that our leadership is up to the task of maintaining and improving the excellence of our programs.

Good birding and Good Luck.

Letter from the Editor

As I write this, my dear friend Michael Hogg is leaving as president – after serving six years, the maximum number of consecutive years allowed, according to IOS by-laws.

Michael and I have been with this organization since it was just an idea—we have worked together for more than 17 years, he, serving as treasurer, board member, and president, and I, trying to get the Meadowlark out four times a year.

It hasn't been easy. He and I can attest to that. Some folks were impatient, others demanding, others accusatory. At times, I was impatient, too, wanting to get things done more quickly than what was happening.

Over the years, I've learned patience is a virtue, true friendship is a blessing, and an organization like IOS is worth every minute spent on keeping it alive.

Here's what we have accomplished in 17 years – completed and mailed nearly 68 different issues of Meadowlark and Wings Over The Prairie, created a Web site, improved the Web site, helped organize and took ownership of the Gull Frolic, hosted 16 annual or spring weekend meetings, hosted shorebird spectacles that truly were spectacular, fine-tuned our field trips to offer something new and different from other field trips offered by the many fine local birding clubs, given thousands of dollars to researchers working on projects to help avian species thrive in Illinois (last year, with help from individuals and the DuPage Birding Club, we gave FIVE \$500 scholarships.) And now we are looking toward the future with more ideas, that will take, time, patience, and yes, perhaps even a little misunderstandings until everything gets smoothed over.

I've also learned how much work goes on behind the scenes – mailing, licking envelopes, sorting envelopes with zip codes (a tortuous job), proofing ads, creating ads, getting the annual meeting lined up (all those calls to get a good price, get raffle prizes lined up.)

Here's my message to you all – if you are an active member of IOS, thank you so very much: Please continue your support. If you have lots of ideas (or complaints), but have never greeted folks at the Gull Frolic, placed a stamp on an envelope, written a short story for Meadowlark, called for quotes on a project, we've got a brand new president, Jenny Vogt, eager for your help. Through IOS and other birding clubs, Jenny has become a good friend and has shown me what a hard-working, intelligent, creative woman she is. We are lucky to have Michael, Jenny, and so many others willing to roll up their sleeves for the good of IOS. Won't you join us?

See you in the field.

Carlyle Lake Gulls:

a season of rarities with notes on how and when to locate them

By Dan Kassebaum

The fall of 2007 through late winter 2008 produced an exciting season of rare gulls at Carlyle Lake. Although Carlyle Lake occupies parts of three counties, Bond, Clinton, and Fayette, the dam and the deep water are in Clinton County, as are most of the gulls. A lake record high of 13 species was observed for the fall/winter season including: Laughing Gull (*Leucophaeus atricilla*), Franklin's Gull (*Leucophaeus pipixcan*), Little Gull (*Hydrocoloeus minutus*), Bonaparte's Gull (*Chroicocephalus philadel-*

phia), Mew Gull (*Larus canus brachyrhynchus*), Ring-billed Gull (*Larus delawarensis*), Herring Gull (*Larus argentatus smithsonianus*), Thayer's Gull (*Larus thayeri*), Iceland Gull (*Larus glaucooides kumlieni*), Lesser Black-backed Gull (*Larus fuscus graellsii*), Slaty-backed Gull (*Larus schistisagus*), Glaucous-winged Gull (*Larus glaucescens*), and Sabine's Gull (*Xema sabini*). With the addition of Glaucous-winged Gull and Slaty-backed Gull the season of 2007/2008, the lake list now stands at 17 species.

Identification tips and data

When attempting to identify gulls at Carlyle Lake, it is helpful to break them into groups. The larger species behave differently than the smaller species, and locating the larger gulls versus the smaller gulls requires a different strategy. The larger gulls reach their greatest diversity during the coldest weather and prefer to roost in mixed flocks on the ice. These flocks can reach numbers in the thousands. The larger gulls include: Mew Gull, Ring-billed Gull, California Gull (*Larus californicus*), Herring Gull, Thayer's Gull, Iceland Gull, Lesser Black-backed Gull, Slaty-backed Gull, Glaucous-winged Gull, Glaucous Gull (*Larus hyperboreus*), and Great Black-backed Gull (*Larus marinus*). The smaller species are more likely to occur as migrants, especially in fall, and avoid the coldest weather. September, October, and November are the best months for these species, which are generally identified on the wing, through a scope, and often at great distances. The smaller species include: Laughing Gull, Franklin's Gull, Little Gull, Bonaparte's Gull, Sabine's Gull, and Black-legged Kittiwake (*Rissa tridactyla*).

Carlyle Lake was completed by the U.S. Army Corps of Engineers in 1967, but gull data for the lake prior to 1982 are minimal to absent. Sadly, the first 25 years of the lake went nearly undocumented. Beginning with the fall and winter of 1982-83, Carlyle Lake has become a regular destination for birders looking for rare gulls in Illinois. Pioneers from the 1980s as indicated by the published data in Nature Notes – Journal of the Webster Groves Nature Study Society and Illinois Birds and Birding include Dave Jones, Bill Rudden, and Skip Russell of St. Louis; Leroy Harrison of Olney; and Denny Jones of Lawrenceville. Gull data at Carlyle were consistently diverse throughout the 1980s and include most of the first published species records for the lake: Great Black-backed Gull (November 1982 – Dave Jones), Glaucous Gull (December 82 – Rudden), Black-legged Kittiwake (December 83 – Rudden), Lesser Black-backed Gull (December 83 – Russell), Thayer's Gull (March 84 – Harrison and Jones), Little Gull (April 84 – Russell), Laughing Gull (Nov 85 – Rudden), Mew Gull (Feb 86 – Rudden), Sabine's Gull (September 86 – Harrison), and California Gull (October 89 – Rudden).

A shift occurred in the early 1990s with little published data for the lake coming from the initial observers who were so active in the 1980s. Instead, most of the more recent data can be attributed to Dan Kassebaum of Belleville, Keith McMullen of O'Fallon, and Mark Seiffert of Carlyle. Throughout the 1990s and currently, the reputation for Carlyle Lake as a major migrant trap has grown, and as a result has renewed in part an interest from some of the old guard. On any given fall/winter weekend at Carlyle, you're likely to cross paths with Bill Rudden or Leroy Harrison, and if you are a keen observer, you'll pay as much attention to the birders as to the birds. Remember these are the guys (Rudden and Harrison) who established nearly all of the new paradigms for gulls in the St. Louis area and southern Illinois. Take a peek through Rudden's vintage scope, then bust out your Peterson – 4th edition (1980) and see if you are up to the task.

Gull diversity through a given fall and winter season, which I define as the southern movement of birds from northern breeding grounds into Illinois and the return trip in late winter, has been recorded at Carlyle

Lake since the fall of 1982 through the present, 2008. (See Tables 1, 2 and 3.) This migratory pattern is basically true for all Illinois gull species aside from Laughing Gull, which nests along the coast to our east and south and tends to wander into Illinois throughout the late spring and hottest parts of the summer. Placing data for Laughing Gull into the correct season, as defined by this report, can be a bit arbitrary, but since its occurrence has been nearly annual at Carlyle since 1985, a data point for all but two of the seasons can be established. I've selected this method to determine per annum gull species at Carlyle because it relies on a single season of winter weather as the limiting factor, instead of a combination of two separate winters at the beginning and end of a calendar year.

The severity of the winter weather and especially the occurrence of ice greatly influence the diversity of the larger species of gulls. An ice shelf of some permanence will attract large numbers of gulls, and with the larger numbers comes greater diversity. In seasons with warmer weather, ice is at a minimum. The lack of ice poses two problems: Gulls are less concentrated at their roosts and harder to observe. The gulls have a much larger area over the lake in which to forage, resulting in fewer birds within an identifiable range. In seasons with colder weather, ice is the norm. If the lake completely freezes, nearly all the gulls will abandon and move either down river to the power plant at Baldwin or west to the locks and dams along the Mississippi River. The best combination for large numbers of gulls and greater diversity is to have the lake mostly frozen while retaining some pockets of open water in which the gulls can feed.

Open water will likely hold large numbers of wintering waterfowl, especially divers such as Common Goldeneye (*Bucephala clangula*) and Common Merganser (*Mergus merganser*). The large gulls are very opportunistic and swarm over the divers in an attempt to rob them of their fish as they pop to the surface. When looking for large gulls, I seek out rafts of goldeneye and mergansers.

The ducks, unless flushed by a passing boat, will remain with the school of fish on which they are feeding for hours at a time. This will also be true for the gulls. A raft of several hundred ducks will often attract a like number of gulls. Scoping patiently through the gulls can be quite rewarding. By this method I discovered a California Gull on 9 January 2000, another California Gull on 3 December 2005, and a Slaty-backed Gull on 16 December 2007. This method also works as a filter, because Ring-billed Gulls, which may represent up to 95 percent of the gulls present at the lake throughout the winter, are less likely to feed in this manner, and thus concentrates the Herring Gulls. In winter, it is with Herring Gulls that the rarer species are likely occurring, and any concentration or increase in Herring Gulls will promote the likelihood of finding a rarity.

The distribution of gulls throughout the state is dependent on large bodies of water. In terms of basics, gulls need food and a place to loaf and roost. Any large body of water that can supply large amounts of food with sufficient loafing and roost areas will attract large numbers of gulls. In terms of gull finding, access and proximity are essential. Carlyle Lake excels in this manner, as few areas around the lake cannot be accessed, and the most vital areas, the beach and the dam, provide excellent access. Of the 17 species of gull recorded at the lake, each has been observed either on the beach, from atop the dam,

or in the spillway where they feed. Another factor which makes Carlyle Lake an ideal place to look for gulls is that the main basin of the lake can be seen in its entirety from nearly any vantage point. Aside from the dam, the three best places to scope the lake are from Saddledam No. 2, Point 18 within South Shore State Park, and from the pavilion at the south end of Eldon Hazlet State Park. For these reasons, gulls which may be considered rare for other parts of the state can be found regularly, if not annually, at Carlyle. This is especially true for Sabine's Gull, which is almost a sure bet in September.

Gull numbers at Carlyle Lake peak three times a year: late fall, dominated by Ring-billed Gulls and Bonaparte's Gulls; late-winter, dominated by Ring-billed Gulls and Herring Gulls; and mid-spring, dominated by Ring-billed Gulls and Bonaparte's Gulls. Ring-billed Gull at seasonal peaks can exceed daily totals of 30,000 to 50,000 birds. During peak periods, Bonaparte's Gulls can exceed 5,000 to 8,000 birds in the fall (late October through early December), and 1,500 to 3,000 in the spring (late March through mid-April). Smaller numbers of Herring Gull are present at the lake fall through spring, but only reach significant concentrations of several hundred birds during periods of ice. Franklin's Gull may produce daily counts of several hundred birds briefly in October, but the other species of gull recorded at the lake occur in very low numbers and can be considered rare.

The gulls of 2007/2008

Of the nine regularly occurring (above the mean) gull species at Carlyle Lake, only Glaucous Gull was missed for the 2007-08 season; however, its occurrence was expected given that the lake was mostly frozen much of the winter. Five unexpected species made gull watching very enjoyable this season: Glaucous-winged Gull (Sep 8 – Apr 12); Little Gull (Nov 22-27); Slaty-backed Gull (Dec 16-18); Iceland Gull (Dec 23 – Jan 21); and Mew Gull (Feb 23-24).

The weekend of the Glaucous-winged Gull (8-9 September) was

Table 1.

Gull rank and diversity at Carlyle Lake – 1982-2008

Annual

- Ring-billed Gull (abundant – fall through spring, a few persist through summer)
- Bonaparte's Gull (common – spring and fall, rare - winter)
- Herring Gull (fairly common – fall into spring, common some winters)
- Franklin's Gull (fairly common – fall, rare – spring)

Rare but regular – observed most years in small numbers

- Laughing Gull (rare - spring through fall, mostly summer)
- Lesser Black-backed Gull (rare but increasing - fall through spring)
- Sabine's Gull (rare - fall, nearly annual)
- Thayer's Gull (rare – late fall through winter)
- Glaucous Gull (rare – winter, strongly associated with ice)

Rare and irregular – absent most years

- Black-legged Kittiwake (rare – fall and winter)
- Little Gull (rare – fall, very rare - spring)
- Great Black-backed Gull (rare – winter, strongly associated with ice)
- Iceland Gull (rare – winter, strongly associated with ice)
- California Gull (rare - fall and winter)
- Mew Gull (rare - winter)

Very rare

- Glaucous-winged Gull (very rare – winter, one record)
- Slaty-backed Gull (very rare – winter, one record)

Table 2.

Total gull species by rank per fall/winter at Carlyle Lake – 1982-2008

- 13 species – 2007-08
 - 11 species – 1986-87, 1996-97, 1999-2000, 2000-01, 2004-05
 - 10 species – 1985-86, 1993-94, 1994-95, 1995, 96, 2006-07
 - 9 species – 1983-84, 1991-92, 2001-02, 2003-03, 2005-06
 - 8 species – 1988-89, 1989-90, 1992-93, 1997-98, 2003-04
 - 7 species – 1987-88
 - 6 species – 1982-83, 1984-85, 1990-91, 1998-99
- Mean 9; Median 9; Mode 8, 9, 10, 11.

Table 3.

Seasonal rank by species per fall/winter at Carlyle Lake – 1982-2008

- 26 seasons – Franklin's Gull, Bonaparte's Gull, Ring-billed Gull, Herring Gull
- 21 seasons – Laughing Gull
- 20 seasons – Lesser Black-backed Gull
- 17 seasons – Thayer's Gull, Sabine's Gull
- 16 seasons – Glaucous Gull
- 9 seasons – Black-legged Kittiwake
- 8 seasons – Little Gull, Great Black-backed Gull
- 5 seasons – California Gull
- 4 seasons – Mew Gull
- 3 seasons – Iceland Gull
- 1 season – Slaty-backed Gull, Glaucous-winged Gull

Arctic Tern at West Access Beach, Carlyle Lake, Clinton County. 9 September. Photo by Mike Thelen.

truly special. I was to meet Mark Seiffert and Travis Mahan at the lake. We expected that jaegers and Sabine's Gulls would likely be associated with a cold front passage that was predicted that day. At dawn, Mark spotted the adult Glaucous-winged Gull on the West Access Beach, and we quickly set to work getting documentary photographs. Travis was soon to arrive, and we alerted others with rather early, but excusable, phone calls. Before we scoped the lake, we headed north to Fayette County to check out the four Wood Storks (*Mycteria americana*) that had been reported along Hurricane Creek on 28 August. The land owner Francis Baldwin, along with Sandy Britt and Charley Marbut, were very gracious in making arrangements for so many to visit and view the birds. Once back at the lake we met at Eldon Hazlet State Park to scope from the pavilion. The pavilion provides an excellent field of view and is elevated, which helps minimize refraction. As planned, we located two Sabine's Gulls and two Parasitic Jaegers (*Stercorarius parasiticus*). The excitement continued into Sunday when Mike Thelen found an adult Arctic Tern (*Sterna paradisaea*) at the West Access Beach. By the time others arrived, the tern had dispersed onto the lake. Luckily Mike got excellent photos for a first lake record.

Little Gull has been recorded at the lake several times, but it is always a thrill to see another. Bill Rudden was birding Thanksgiving morning and found an adult at the Carlyle Sewage Ponds. My getting to the lake that morning was interrupted by a huge flock of blackbirds at the Monterey Mine, which included a single Great-

Little Gull at Carlyle Sewage Pond, Clinton County. 23 November 2007.

Photo by Joseph Prosis.

tailed Grackle (*Quiscalus mexicanus*). With dinner plans pending, I had to get home only to listen to Bill's phone message. With Carlyle Lake so close, I was able to eat as planned, make a quick trip back to the lake, and then home for leftovers by dark. I did manage to get a few photos and observed a second adult Little Gull within the larger flock of Bonaparte's Gulls at the sewage pond. A single adult stuck around for a few more days and was seen by many through 27 November.

Slaty-backed Gull (center) at Carlyle Lake, Clinton County. 18 December 2007. Photo by Dan Kassebaum.

My big thrill for the winter was the adult Slaty-backed Gull. Although this species seems to be more numerous around the Great Lakes and Maritime Provinces than in years past, I never expected to find one at Carlyle Lake. The weather for the weekend of 16 December was terrible. We attempted to run the Rend Lake CBC on 15 December, but cancelled by daybreak due to a snowstorm. Since I had been at Rend all night and geared up for a day of birding, I adjusted my plans and headed north to scout for the Carlyle Lake CBC, which was scheduled for 18 December. Locally the roads weren't so bad and getting home was slow, but not a problem. On 16 December, I was due at Lake Shelbyville for another CBC, but that too was cancelled due to the storm. Not wanting to waste the remainder

Iceland Gull (second-cycle) at Carlyle Lake, Clinton County. 20 January 2008. Photo by Dan Kassebaum.

Mew Gull at West Access Marina, Carlyle Lake, Clinton County. 23 February 2008. Photo by Dan Kassebaum.

of the weekend indoors, I cautiously made my way back to Carlyle for another day of scouting. Arriving just before ten, I set up on Saddledam No. 2 to scope from my truck. A large raft of Common Goldeneyes were feeding within a hundred yards of the shore, and with the no boat traffic, I had the lake to myself. Rafting near the goldeneye was a dark-backed gull which seemed too big for a Lesser Black-backed Gull and too small and pale for a Great Black-backed Gull. I watched and waited for almost an hour before the bird flew. Right away I could see the pink feet, but the wing tip pattern in flight was difficult to discern. I tentatively hot-lined the bird as an adult Slaty-backed Gull, or possibly a Western Gull (*Larus occidentalis*). By the time other birders had arrived, I was confident with the identification, but my photos that day were distant and inconclusive. By the CBC on 18 December, several others had seen the bird, and we were able to get more photos, including Josh Uffman's diagnostic flight shots. Much confusion followed the remainder of the week as there were several Lesser Black-backed Gulls present, and reports of the Slaty-backed Gull were muddled by misidentifications.

Iceland Gulls are not so rare in Illinois, but downstate and away from the locks and dams along the Mississippi River, there are few records. Prior to this winter, there were only two previous records for Carlyle Lake: 13 February 1997 and 5 January 2001. We observed an adult Iceland Gull on 23 December 2007, and first cycle birds on 2 January and 20-21 January 2008.

The Carlyle winter ended with another gull rarity on 23 February, a sub-adult Mew Gull. Luckily the bird was on the West Access Marina docks and very approachable. I took more than 100 photos before I picked up the phone. Bill Rudden arrived, and we took each other to task discussing the size of the bird and its sub-specific identification. With so much gull activity throughout the winter, I began traveling with a mobile library of Grant (1986), Olsen and Larsson (2004), and Howell and Dunn (2007). Riffling through the texts as you're observing a rare gull is a great lesson. The intent and focus produces a level of retained knowledge that far surpasses other approaches and can only be helpful, if not vital, to further discoveries. Bill, always pushing the envelope, introduced the possibility of 'Kamchatka' Gull (*Larus canus kamtschatschensis*). Within a few hours several other birders arrived with cameras in tow. The quality of photos is such that this bird is very likely a 'Kamchatka' Gull. An article in this issue describes the bird in more detail, but see Stotz (2008).

Aside from the relatively easy identifications of adult gulls are the

trickier first-cycle and second-cycle birds. Two birds, in particular, were of great interest this season. Although the photos may prove inconclusive, I'm not so ready to assume that all unusual immatures are Herring Gulls by default. With the advent of north-east Asian gulls, which are now being seen with some regularity around the Great Lakes, the prospects of Black-tailed Gull (*Larus crassirostris*), 'Kamchatka' Gull, Vega Gull (*Larus argentatus vegae*), Slaty-backed Gull, and Glaucous-winged Gull are all worthy of consideration when scoping a large winter roost. If this season is any indication, when Asian gulls are present, take advantage of the list serves and map out where others are being seen. It is likely that the movement of birds is considerable given the right weather pattern and may involve multiple species possibly dispersing from a common source. Is it also safe to assume that if adults are present, younger birds are likely present as well? How many first-cycle and second-cycle birds are going unidentified or, worse yet, misidentified? A new era may be upon us. The digital camera has brought birding to a new threshold and few species are easier to photograph than gulls. I can hardly wait for next winter and another season of rarities.

A potential first North American record of 'Kamchatka' Mew Gull away from Pacific Ocean

By Bill Rudden

At around 10:30 a.m. on Saturday, 23 February 2008, Dan Kassebaum called Travis A. Mahan to report an adult Mew Gull (*Larus canus*) that he had found around 8 a.m. while scanning through the large numbers of gulls amassed at the sailboat marina at the south end of Carlyle Lake (Clinton County). I also happened to be birding around Carlyle Lake and ran into Dan at the marina. He told me about the gull, which of course had just flown from the ice out onto the main lake. Dan relocated the gull when it returned to the marina. My first comment after observing the gull through my binoculars was, "It's huge!" We both returned to our vehicles for warmth and to steady our spotting scopes to obtain more photographs. Dan had

already acquired more than 100 photographs prior to my arrival.

The marina maintained a high level of gull activity. Hundreds of Ring-billed Gulls (*Larus delawarensis*), along with the Mew Gull, were feeding on the countless fish that were trapped in the ice. Fortunately, the Mew Gull defended a small territory that was among the closest line of docks to our position. This allowed close observation and accessibility

FIGURE 4

FIGURE 3

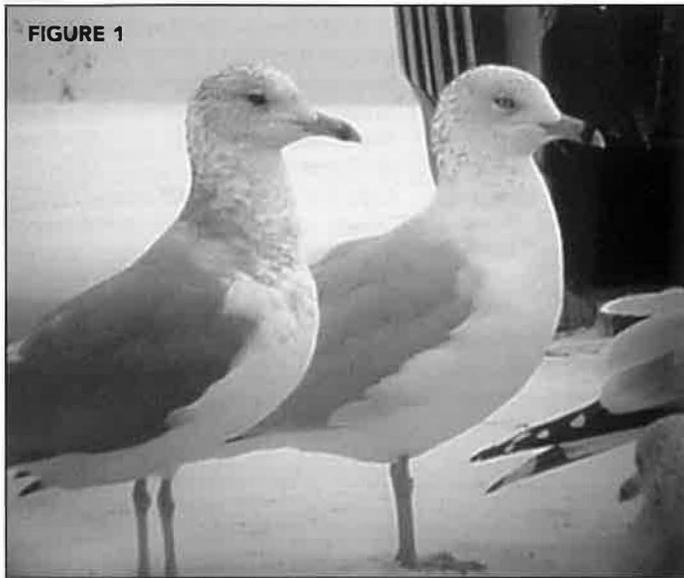

for photographs while it fed voraciously, chiseling fish from the ice. The gull remained in the same area of the marina throughout much of the day despite being flushed by maintenance workers numerous times.

The Mew Gull had some distinctive features that set it apart from the nearby Ring-billed Gulls. It was equal in size to the Ring-billed Gulls and seemed larger, darker-backed, and longer-billed than that expected for the North American race of Mew Gull (*Larus canus brachyrhynchus*). Upon further observation, the bird was determined to be an immature due to the brownish coloration on its

primary coverts, greenish legs, and limited dark tertial markings. The gull did, however, have a clean, all-white tail.

After some maintenance work on the docks temporarily flushed the flock of gulls from the marina, we started to discuss the possibilities of this gull's identity. Dan had a few references in his truck, which included Howell and Dunn's Gulls of the Americas and Olsen and Larsson's Gulls of North America, Europe, and Asia. Given the features observed in this bird, other races of Mew Gull were examined and discussed: the European and Asian races Common

Gull (*Larus canus canus* and *Larus canus heinei*); and the east Asian race 'Kamchatka' Gull (*Larus canus kamtschatschensis*). Features such as the dark back coloration, dark eye, blue-green leg coloration, and long, thin bill with a limited gonydeal angle suggested a small California Gull (*Larus californicus*). "This isn't a small California?" was a question I presented to Dan, who quickly put that scare to rest by pointing out the presence of white tongue tips on the inner primaries (P5-7). The bill was also too thin and lacked the red and black gony spots.

Potential 'Kamchatka' Mew Gull at Carlyle Lake, Clinton County.

Photos taken 23 February 2008 clockwise as follows, by Dan Kassebaum (see gull at left, Figure 1 for comparison with Ring-billed Gull at right), Travis A. Mahan (see gull at right, Figure 2), and Tom Bormann (Figure 3), and on 24 February 2008 in flight by Frank Holmes (Figure 4).

As the day progressed, other birders began to arrive: Travis from Decatur and Joe Eades, Dave Rogles, and Tom Bormann from the St. Louis area. Disguised as listers, these guys come to study the prey and learn the tactics used in the successful hunt. The show-and-tell birding continued through the afternoon. Five more birders joined the ardent group of larophiles: Charley Marbut; Charlene and Jim Malone; and Mark and Mike Seiffert. While Tom and Travis secured great photographs, we jokingly called the gull a miniature Slaty-backed Gull (*Larus schistisagus*). The discussion closed with the loss of daylight. All the field marks fit 'Kamchatka' Gull, but one feather, P8, also fit third-cycle Mew Gull.

The field marks were clearly on the outer limits for the expected North American race of Mew Gull, and all were consistent with 'Kamchatka' Gull. Therefore, 'Kamchatka' Gull identification was researched and suggested. The Carlyle gull's structure was the base identifying feature that, when considered together with the plumage characteristics, seemed to eliminate Mew Gull. The following list of features describes the Carlyle gull as compared with Ring-billed Gull. Features highlighted in

bold underlined text are offered as attributes noted in the subject gull that are not present, or are rare, in the North American race of Mew Gull, and thus strongly support the identification as 'Kamchatka' Gull.

Photos and field descriptions were quickly posted online to not only alert the Illinois birding community to the presence of this bird (a great bird, no matter what subspecies), but also to entice discussion on this gull's identity. Information was circulated via several internet sources, which included Illinois Birders Exchanging Thoughts (IBET), the Illinois Birders' Forum, Surfbirds, and Frontiers of Identification (ID-Frontiers). The identification of this gull as a likely 'Kamchatka' Gull was supported. No doubt the photographs from Tom Bormann, Frank Holmes, and Travis Mahan made identification a possibility (See Figures 1-4). Alvaro Jaramillo set the tone (via ID-Frontiers): "I was just doing a gull class this weekend and we had the pleasure of looking at 200+ Mew Gulls and no bird looked like yours, I mean that is a huge Mew Gull with a big bill and very thick legs." After presenting a comprehensive critique of the Carlyle gull's structure and dimensions, Martin Reid sum-

marized his thoughts as follows (via ID-Frontiers): "Thus we have a gull that has a plumage and apparent biometrics that is typical in almost all known respects (and possible fairly typical for the eye color at this age) for 'Kamchatka' Gull." Norman D. van Sweln also found the 'Kamchatka' Gull identification appealing: "A bird this big can only belong to the most easterly and largest of the *canus* forms: *kamtschatschensis*!" A response to descriptions of the Carlyle gull's vocalizations was posted on ID-Frontiers by Louis Bevier: "the calls described sound pretty far outside what is typical of Mew Gull."

Collectively, the *Larus canus* subspecies maintain a broad distribution throughout the northern hemisphere: Mew Gull breeds in northwestern North America and is the only form of *Larus canus* in North America; Common Gull (*Larus canus canus*) breeds in western Asia and Europe; Russian Gull (*Larus canus heinei*) breeds in central Asia and Russia; and 'Kamchatka' Gull (*Larus canus kamtschatschensis*) breeds in eastern Asia and Siberia. The 'Kamchatka' Gull's range in eastern Siberia basically mirrors the range of Mew Gull in Alaska and western Canada. This

Body:

- Nearly a full adult in basic plumage
- Equal in size to nearby Ring-billed Gulls
- Full-headed with sloped profile
- Medium dark-gray back with wide white tertial and scapular crescents
- Black primaries with white apical spots on P5, P6 (small), and P7 tiny
- All-white tail
- Dusky-brown streaking on head, gathering on nape and forming crescent markings on chest
- Dark-gray back with slight brown (iridescent) cast to upperwing coverts
- Greenish-based parallel-edged bill, equal in length to the bills of nearby Ring-billed Gulls
- Bill with diffused sub-terminal dark band with yellow tip
- Small brown eye with black pupil
- Blue-green leg coloration

Open wing:

- Wingtips black with black markings present on outer four primary coverts
- Large mirrors present on P9 and P10
- Thin gray tongue on inner web of P8
- Deep gray tongues with white tips (pearls) on P5, P6, and P7
- Small black markings (broken bar) on webs of P4
- Dark markings on primary coverts and alula
- Wide white trailing edge on inner secondaries, narrowing on outer secondaries
- Underwings of remiges smoky gray

Voice (not recorded):

- A preliminary comparison of vocalizations heard in the field with commercial recordings of the various subspecies seemed to fit best with the North American race; however, there were very few 'Kamchatka' recordings from which to compare, which may not have contained calls from similar feeding situations.

region of eastern Asia also holds other known Asiatic strays, including Slaty-backed Gull, Black-tailed Gull (*Larus crassirostris*) and Vega Gull (*Larus vegae*), which are yielding increased sightings in North America. In fact, the winter of 2007-2008 provided an unprecedented number of Slaty-backed Gull reports. They were reported from both coasts as well as from several inland locations around the Great Lakes.

Despite the extreme rarity of a 'Kamchatka' Gull being found in southern Illinois, this wouldn't be the first time a sighting of this magnitude occurred. During the winter of 1983-1984, the first Slaty-backed Gull for North America away from Alaska was found along the Mississippi River

near St. Louis, fifty miles west of Carlyle Lake (Goetz, R. et al. 1986). Soon after this sighting, Slaty-backed Gulls started to be found along the coast of California. Perhaps lightning can strike the same spot twice.

Editor's Note: The Illinois Ornithological Records Committee accepted this bird as a Mew Gull (Stotz 2008), writing that "we could not at present be certain that this individual belonged to *kamchatschensis*, but that the evidence was generally supportive of that identification."

Three rare sea ducks in central Illinois

By Matthew Winks

Long-tailed Duck.

12 December 2007.

Bloomington, McLean County.

Photo by Matt Fraker.

The winter season of 2007-2008 provided a unique opportunity for birders in central Illinois to view rare sea ducks as they passed through the middle of the state. Aside from Clinton Lake and the Illinois River, sea ducks, especially the less common species are difficult to find in this area. Ironically, I took a trip to the Indiana lakefront on 10 November 2007 to see some of the more difficult-to-find sea ducks. Excluding a couple of Red-throated Loons and a Great Black-backed Gull, the trip was unproductive. It was two favorite local spots in central Illinois that ultimately provided me with three great life birds.

The first goodie was a Black Scoter (*Melanitta nigra*) on 25 November 2007 at Evergreen Lake. That day, the John Wesley Powell Audubon Society had just returned from a field trip to Clinton Lake, where we had a good diversity and number of

ducks, loons, and grebes, but nothing unusual. First we had miserable cold rain, and then came an annoying barrage of ice pellets.

Despite the nasty conditions, I decided to check Evergreen Lake on my way home. While scanning the lake from the boat launch I noticed a lone duck on the far side of the main basin (Woodford County). It was stocky and dark overall with a pale cheek and a stout bill.

Black Scoter crossed my mind, but I figured it was probably just a Ruddy Duck playing tricks on me. The bird was too far away and visibility was too poor for me to call a bird with which I had no experience. So I called my good friend, Matt Fraker, who always seems to answer the phone and help me identify anything different I find. He happened to be en route to his nearby farm and decided to see the bird himself. I packed up my scope and field guide and went

to search for a closer vantage point. On the north side of the lake, I found a spot where you could hike in and get much closer to the duck while being concealed by vegetation. After a quick look from this distance, it was obvious the duck was too bulky while the head and bill too relatively small for a Ruddy Duck. The pale cheek was rather muddy and had a faint vertical line across it. I was looking at a female or immature Black Scoter. Matt met me a few minutes later and we had the pleasure of watching this bird preening and diving for 30 minutes. The Black Scoter stayed at Evergreen for three more days until another cold front passed through.

My next encounter with an unusual sea duck in McLean County was

on 11 December 2007 at White Oak Lake, which is a somewhat small residential lake at White Oak Park in Bloomington. I often walk the mile-long path around this lake over my lunch break. During waterfowl migration, I set up the scope and scan the waterfowl. The lake draws some good ducks and viewing conditions are excellent here. While scanning the ducks, I saw a bird that caused my jaw to drop. It was a gaudy Long-tailed Duck (*Clangula hyemalis*). Matt Fraker was unavailable so I called a local Audubon Society field trip leader, Les Allen. He was excited to hear about the duck and asked if I thought it was male or female. Neither being familiar with the different plumages nor having a field guide handy, I had to describe the duck to Les over the phone. After talking it over we agreed it was an adult winter male. Les Allen and Dale Birkenholz came out to see the bird early that afternoon, and the dapper duck remained for many

birders to enjoy. It even got included on the Bloomington Christmas Bird Count on 20 December 2007.

The last sea duck sighting that season came at the end of winter when ducks were migrating through and resting at Evergreen Lake (McLean County). On 3 March 2008, I scanned the south end of the lake to see hundreds of ducks, mostly Mallards, but also Common and Hooded Mergansers, Northern Pintails, American Wigeons, American Black Ducks, and a Canvasback. Among these I found a very different looking duck. It was rather bulky, heavy-billed, and flat, dark brown with two pale markings spots on the face. This duck reminded me of the scoter I had seen a few months earlier, but it was rather non-descript. I called Matt Fraker and informed him there was another scoter at Evergreen Lake. "Are you serious?" he asked, since I had reported false rarities to him before (i.e. Western Tanager,

Purple Sandpiper) just for the sheer fun of it.

I told him it's not a Black Scoter, but either a Surf or White-winged, neither of which I had seen before. "I'll be there in about 20 minutes!" replied Matt.

While, waiting, I went to look for a better spot to get the scope on the duck. Hiking down the Mallard Access Trail, I found an opening in the trees with good light. After a better look at the duck, I thought it was a White-winged Scoter (*Melanitta fusca*), but the white markings on the face weren't clear enough to rule out a Surf (*M. perspicillata*). Finally the bird opened its wings, exposing the large white patches and revealing its identity. It was McLean County's first record of White-winged Scoter.

Ruddy Turnstone: first Illinois CBC record

By Carolyn Marsh,
Calumet City-Sand Ridge Compiler

The bi-state Calumet City-Sand Ridge Christmas Bird Count held 29 December 2007 produced an extraordinary result, a Ruddy Turnstone (*Arenaria interpres*). The shorebird was observed at the Whiting Refinery Beach in Whiting, Indiana on the shore of Lake Michigan. It was seen at the break of day by Carolyn Marsh and John Kendall.

The bird was first discovered on 25 November 2007 at the Hammond Bird Sanctuary beach and it surprisingly stayed in the area until Count Day, 29 December and beyond when it was last seen on 23 January 2008. It was also with a Dunlin on 26 December during Count Week.

The Ruddy Turnstone spent most days on the Whiting Refinery Beach among gulls and mallards. It was seen eating dead fish and leftovers from gulls and probing seaweeds and turning over rocks and shells with its strong and slightly upturned upper mandible.

The turnstone probably survived snowstorms, with the lowest temperature of -1° F below zero on 19 January 2008, because of the refinery warm water discharge pipe at the beach. The beach is isolated and recessed in an artificially created basin that shelters it from inclement weather.

The Ruddy Turnstone breeds in high-arctic Canada and Greenland. It is a regular fall migrant through-

The Ruddy Turnstone above was seen during the Calumet City - Sand Ridge Christmas Bird Count on 29 December 2007. Photo by John Kendall.

out the Midwest, but sightings and numbers have been declining in past years in both Illinois and Indiana. This is also a record late fall-winter migration date for Illinois and Indiana. This species is typically documented on the west and east coasts during the annual Christmas Bird Count period.

It is likely based on the following data that at least two Ruddy Turnstones were on the lakefront during the Christmas Bird Count period and beyond.

25 November 2007 – Alternate plumage
Hammond Bird Sanctuary,
Hammond, Indiana
John Cassady, Carolyn A. Marsh
and Jeff McCoy

The 2007/2008 Illinois Christmas Bird Count

By Paul Sweet

What a difference a year can make! The 2006/2007 Christmas Bird Count season was very warm and dry. But during the 2007/2008 CBC season, cold temperatures dominated, and snow cover was recorded on half the counts in Illinois. At least one downstate count was postponed (twice) due to winter storms. However, some good birds were still found by our intrepid counters.

Not surprisingly, gulls were headliners, although several species of shorebirds were good finds as well.

In all, 64 counts were conducted in Illinois in 2007/2008, including four Iowa counts that cross the Mississippi. This includes two new counts we welcomed to the state: Coles-Cumberland and Shelbyville Reservoir. A total of 175 species were counted, with an additional 4 count-week birds, including Dunlin. Seven counts reached the 100 species mark, with Carlyle leading the way with a state record 114. There were 1,109 field observers who put in 3,385 party-hours, covering 19,950 miles. In addition, 275 feeder watchers contributed 495 hours of observation. Fermilab had the most field observers with 95, and as usual Waukegan had the most feeder observers with 78.

Several new species were recorded during the season. The headliner has to be the Slaty-backed Gull that was seen and photographed at Carlyle Lake. The Glaucous-winged Gull on the same count had been present for some time. A Ruddy Turnstone was photographed at Calumet-Sand Ridge (*see photo and story in this issue*).

Ducks through Grebes

Overall, goose numbers were down from the last two years' high counts, especially Greater White-fronted and Snow Geese. 79 Ross' Geese were counted on 9 counts, all in Southern Illinois. Trumpeter Swans were on 7 counts, for a total of 56. The 27 counted at Union County represented a new state high, as did the 99 Tundra Swans at Chautauqua NWR. Unusual ducks included a Harlequin Duck on the Chicago Urban count, 2 Surf Scoters at Waukegan, lone Black Scoters at Bird Haven and Calumet, and lone Long-tailed Ducks at Carlyle and Bloomington. The 2,859 Red-breasted Mergansers at Chicago Lakefront represented a new state high.

Only 417 Ring-necked Pheasants were counted, on 26 counts. In contrast, there were 2,095 Wild Turkeys on 41 counts, including 240 in Champaign County alone. The Greater Prairie-Chickens at Newton were down to 45 four years after a record high of 106. Only 19 counts recorded Northern Bobwhite, and only 1 count reported 1 Gray Partridge at Princeton-Camanche.

Waukegan had a Red-throated Loon, and lone Common

This Dunlin was seen during the Calumet City-Sand Ridge Christmas Bird Count Week on 26 December 2007. Six species of shorebirds were observed during the 2007/2008 Illinois Christmas Bird Count. Photo by Michael Topp.

Loons were reported on 4 counts. The 132 Pied-billed Grebes at Crab Orchard represented a new state high. The 121 Horned Grebes at Baldwin Lake were also noteworthy. Eared Grebes included one at Rend Lake and 2 at Crab Orchard. A count-week Red-necked Grebe was at Springfield.

Pelicans through Cranes

American White Pelicans were on 6 counts. Double-crested Cormorant numbers were very low overall, with 115 on 14 counts. Meredosia Island, Kankakee Valley, and Crane Lake (2) reported Great Egrets. Black-crowned Night-Herons were reported at 3 locations, with the 21 at Calumet-Sand Ridge being notable.

Black and Turkey Vultures were in typical numbers in Southern Illinois. Bald Eagles were noted on 48 counts, with 228 at Green Island, 422 at Andalusia, and 429 at Muscatine. The Andalusia count was the highest in the state for a count not centered in Iowa. 14 Sharp-shinned Hawks at Lisle Arboretum were notable, and 37 Cooper's Hawks at Fermilab represented a new state record. A Northern Goshawk was documented at Joliet. 2 others were reported without documentation. A fourth Northern Goshawk report was unconvincing. Union County's 47 Red-shouldered Hawk represented a new state high. Pere Marquette reported a Harlan's Hawk and a Krider's Hawk. Merlins were reported on 7 counts, as were Peregrine Falcons.

The only Virginia Rail was a count-week bird at Waukegan. Only 15 Sandhill Cranes were reported, on 5 counts.

Shorebirds through Jaegers

Despite the cold and stormy weather, 6 species of shorebirds were reported this CBC season. A Ruddy Turnstone at Calumet-Sand Ridge was new for the state. It was accompanied by a count-week Dunlin. 6 Least Sandpipers were at Pere Marquette, and one was at Carlyle. 4 American Woodcocks were reported on 2 counts.

12 species of gull were reported on Illinois CBCs this year. A Little Gull was reported count week at Springfield. Rend Lake's 9500 Bonaparte's Gulls were a new state high. 12 Thayer's Gulls were reported on 5 counts, an Iceland Gull was at Chicago Lakefront, and another was reported count

week at Starved Rock. Lesser Black-backed Gulls were reported on 5 counts, with 5 at Carlyle particularly notable. The Glaucous-winged Gull at Carlyle had been present for some time, but the adult Slaty-backed Gull showed up two days before the count, and apparently left immediately after the count. Solo Glaucous Gulls were reported at Springfield and Calumet-Sand Ridge, and Calumet's 8 Great Black-backed Gulls represented a new state high. Waukegan and Meredosia also reported solo Great Black-backed Gulls. Finally, a 1st year Black-legged Kittiwake was photographed at Kishwaukee. A well-photographed Pomarine Jaeger was still present at Collinsville on count day.

Doves through Woodpeckers

Eurasian Collared-Doves were reported from 25 counts, with Newton's 84 a new state high count. 125 Monk Parakeets were reported from 4 counts. 4 Barn Owls were reported - 3 from Carlyle and 1 from Union County. A Snowy Owl was photographed at Rockford - it had been in the area for some time. A total of 45 Long-eared Owls on 16 counts was the highest state total since 1995. Short-eared Owls appeared to be in typical numbers, with the exception of a state-record 74 at Arklands. A total of 19 Northern Saw-whet Owls was recorded on 12 counts, including a state record 5 at Thorn Creek - Park Forest.

A Rufous Hummingbird was at a feeder in Crab Orchard - the 4th CBC record for the state. Union County recorded an impressive 125 Pileated Woodpeckers.

Flycatchers through Warblers

15 Eastern Phoebes were counted on 7 counts, with one at Kankakee Valley the farthest north. Northern Shrikes put on an impressive invasion, with 72 on 21 counts. Fermilab had a state record 15, while one in Union County (but in Missouri) was exceptionally far south. Blue Jays appeared to be in typical numbers, but 26,207 American Crows is the lowest count in over 20 years. The 2,767 Horned Larks at Carlyle represented a new state high. A lone Tree Swallow was at Crab Orchard. 653 Red-breasted Nuthatches state-wide were the most documented since the same number was recorded in 1993. Lone House Wrens were at Cypress Creek, Jackson County, and Mermet Lake, while Marsh Wrens were at Arklands (2) and Union County.

A Townsend's Solitaire was at Fermilab. This species was first documented on an Illinois CBC in 1958, while the second record occurred in 1983. This year's individual is the fourth since 1995. Hermit Thrush numbers were low this year - only 118 on 25 counts. The odd thing, though, is that they were in typical numbers in Northern Illinois, while many compilers in Southern Illinois reported that they were difficult to find.

Four Gray Catbirds were seen on 3 counts, including 2 on the Chicago Urban count. 432 American Pipits were seen, on 11 counts, with 202 at Cypress Creek a new state high. The 18 at Champaign County were the only ones not in Southern Illinois. Lone Orange-crowned Warblers were at Clinton Lake and Springfield. 248 Yellow-rumped Warblers were counted on 28 counts, while lone Pine Warblers were seen on 4 counts. Pere Marquette recorded a near-record 4 Common Yellowthroats. This species has been reported nearly annually over the last 28 years.

Sparrows through Weaver Finches

Two Spotted Towhees were reported, one at Bloomington and one at Mermet Lake. Four Chipping Sparrows were reported on 3 counts. Lone Vesper Sparrows were at Bloomington and Hennepin. Five Lincoln's Sparrows were reported on 4 counts, while Carlyle had the only Harris's Sparrow. 6 counts reported 'Oregon' Dark-eyed Juncos. Lapland Longspurs appeared to be fairly typical, while 6 Snow Buntings reached Southern Illinois, on three counts. A Chestnut-collared Longspur at Crane Lake is still under review. A Rose-breasted Grosbeak was at Quincy, while an Indigo Bunting was at Union County. Four Western Meadowlarks were reported on 3 counts.

This year, winter finches were finally noticeable again after being counted in low numbers in recent CBCs. 600 Purple Finches were counted on 44 counts, with an impressive 145 at Western Mercer County. 42 Red Crossbills were reported on 5 counts, while Kishwaukee had the only White-winged Crossbill. Common Redpolls were reported on 20 counts, with a total of 346. None of the Hoary Redpolls reported later in the winter were counted during the Christmas Count season. One Evening Grosbeak was at McHenry County. Finally, 16 count circles reported Eurasian Tree Sparrow.

Acknowledgements

As always, I would like to thank all of the count compilers. Without their hard work the CBC would be nothing but a pile of useless numbers. Given the weather this year, however, it only seems appropriate to reserve the biggest acknowledgement to all of the intrepid counters who were willing and eager to challenge the elements to gather all of those numbers.

Data from this year's CBC, and indeed all CBC's ever undertaken, can be found online at the National Audubon Society's website, at www.audubon.org/bird/cbc/. Information on this year's counts can also be found at this site.

About the Tables

The following nine pages include the tables corresponding to the 2007/2008 CBC season in Illinois.

Page 94 includes a list of count names, the coding and the compiler along with weather, observations, party hours, and other statistics. Pages 95, 96, 97, and 98 include the count tallies from the northern section of the state, Pages 99 and 100 include the count tallies from the central section, and pages 101 and 102 include the count tallies from the southern part of the state.

The following abbreviations have been used:

- hc = high count for that circle;
- lc = unusually low count;
- HC = state record high count and
- nc = new species for the state

Field Notes

The 2007-2008 Winter Season

by Kelly J. McKay

Field Notes drawing of Snow Buntings by Denis Kania.

The winter of 2007-2008 showed extreme temperature fluctuations and near-record precipitation. An impressive total of 23 substantial winter storms swept across all or a portion of Illinois during the season, variably bringing rain, ice, sleet, snow, and/or hail.

The season began in earnest on 1 December with a wintery mix of rain, freezing rain, sleet, and snow over the northern third of the state, and with rain and freezing rain over the southern two thirds. A couple days later, 1-3 inches of snow fell across the northern half of Illinois while the southern half received yet more rain. A heavier storm hit the state on 6 December and dropped 3-6 inches of snow across the north, a mix of light snow and rain in the central region, and rain across the south. A very slow-moving winter storm crawled across Illinois over four days (8-11 December), producing moderate amounts of rain and freezing rain statewide. Then, on 15 December, another storm dropped 2-8 inches of snow across the northern third of the state, and rain and freezing rain elsewhere. On 20 December there was light to moderate rain all across Illinois. The steady progression of storms continued on 22-23 December with a very powerful storm driven by 20-30 mph winds. This resulted in severe wind chills and freezing rain and light snow over the north and rain and freezing rain through the central and southern regions. Another strong, storm pounded the state on 27-28 December, dropping light to moderate rain over the entire state, changing over to heavy snow (5-10 inches) in the northern region. December went out like a lion with winds gusting from 30-50 mph statewide on 31 December, dropping yet 4-8 more inches of snow across the northern tier and 1-2 inches of snow across the central portion.

Temperatures in January fluctuated wildly and frequently. A fairly unusual storm ravaged Illinois on 7-8 January, with several severe thunderstorms producing moderate amounts of rainfall statewide, in addition to widespread occurrences of hail and tornadoes. Light to moderate rain occurred on 10 January. Following a week of calm weather, another storm on 17 January left 1-2 inches of snow through the north and a mix of snow and heavy ice across the central portion of the state, coupled with high winds and extreme wind chills. On 21 January, another potent storm with severe wind-chills hit, dropping 3-6 inches of snow across the north and 1-3 inches of snow throughout the southern two

thirds of Illinois. After a week of calm weather, most of the state suffered extreme wind-chills (but only light snowfall) on 29 January. The last day of the month produced 4-8 inches of snow in the northern third, 8-12 inches of snow over the central third, and half an inch of rain across the southern third.

February temperatures averaged below normal, but continued to fluctuate greatly. Winds at 30-40 mph battered Illinois on 10 February, resulting in wind chills of -30 to -40 degrees F. Two closely spaced storms moved across the state on 3-4 and 5-6 February. The first dropped 3-6 inches of snow in the north, light snow and freezing rain in the central, and moderate to heavy rain (1-3 inches) in the southern portions of the state. The second storm began with light to heavy rain statewide, but plummeting temperatures led to 8-16 inches of snow in the north, 2-6 inches of snow across the central belt, and light to moderate rain in the south. After a week of calm weather, there was a steady procession of storms. On 12 February, 1-4 inches of snow fell across the northern two-thirds of the state, while the south received light amounts of freezing rain. Moderate to heavy rain and, in the north, light snow moved across Illinois on 17 February. Two days later, the north received another 1-2 inches of snow, and severe wind chills occurred statewide. On 21 February, light snow fell across the northern half of Illinois, along with light freezing rain through the southern half. Yet another storm on 25-26 February, left 3-6 inches of snow in the northern half and lighter amounts of snow and freezing rain in the southern half of the state. The final storm of this notably stormy winter occurred on 28 February, and produced another 1-3 inches of snow across the northern half of Illinois.

The 2007-2008 season showed high avian diversity, with 185 species reported. This number includes a good variety of lingering fall migrants and species of scarce to accidental occurrence in winter in Illinois. Early spring migrants were little reported.

Most species groups declined in numbers compared to the preceding winter. Notable exceptions were shorebirds and finches. A few groups showed a mix of declines and increases (e.g., diurnal raptors, mimids, sparrows, and blackbirds). Upland gamebirds occurred in fairly typical numbers.

Waterfowl to Herons

The vast majority of waterfowl species were less abundant this winter. Populations among geese were lower overall, particularly for Greater White-fronted and Canada Geese. Snow Geese were slightly more numerous overall, but there was a noticeable reduction in numbers at traditional southern and central concentration sites. Mute and Tundra Swan populations were also somewhat down, while Trumpeter Swans occurred in numbers similar to last winter.

Dabbling ducks declined in abundance. None of the dabbling duck species occurred in noteworthy concentrations. Similarly, diving ducks were less numerous, with no major concentrations reported other than 15,000 Common Mergansers in La Salle County in January. Two **Harlequin Ducks** at Chicago were the most unusual waterfowl species reported.

Upland gamebirds showed little change in numbers over last year. Ring-necked Pheasant was slightly more common, but continues to show low numbers statewide. A **Gray Partridge** in Rock Island County provided one of the few recent records of this species, now virtually extirpated in Illinois.

Three species of loons lingered into December, and several grebe species included a noteworthy concentration of **175 Horned Grebes** in late January.

Numbers of American White Pelicans and Double-crested Cormorants were low this season, and Great Blue Heron populations were reduced over last year. A concentration of **20 Black-crowned Night-Herons** in Madison County was notable.

Vultures to Jaegers

Black and Turkey Vulture appeared in fairly typical numbers this season. Noteworthy counts among other diurnal raptors included more than **1,000 Bald Eagles** along the upper Mississippi River, **17 Cooper's Hawks** at Rockford, and **123 Red-tailed Hawks** in north-central Illinois. Notable sightings included a Northern Goshawk in southern Illinois, single Golden Eagles at five sites in the northern half of the state, with wintering records for Merlin continuing to increase, including a strong winter showing of Merlins statewide. Most noteworthy were two species of falcons at mid-winter in southern Illinois, including a **Gyr Falcon** and three single **Prairie Falcons** in central and southern Illinois. Another Gyr Falcon reported from Madison County is pending IORC review.

A rare winter **Virginia Rail** was noteworthy. American Coot numbers were the lowest in a decade, and Sandhill Crane numbers were also weak. Whooping Cranes from the Wisconsin re-introduction project were located in Monroe and Kane Counties; this population is currently treated as unestablished and records are appended to the main species accounts.

An impressive total of **9 species of shorebirds** was recorded in Illinois during the 2007-2008 season. The only notable shorebird concentration this winter was **120**

Killdeer at Carlyle Lake on 15 December. Records of unusual winter-season species were confined to December, including **Least** and **Pectoral Sandpipers** and two single **Red Phalaropes** in northern and southern Illinois; **Dunlin** in the central and southern regions of the state; and singles of both **Ruddy Turnstone** and **Purple Sandpiper** along Lake Michigan.

Also impressive was a total of **14 species of gulls** reported this winter, although populations for most species were flat to low. The most notable gull concentration was **7,500 Bonaparte's Gulls** at Rend Lake. Now a very rare species in Illinois, a **Little Gull** was found in Springfield. Ring-billed and Herring Gulls both seem to be continuing a trend of decreasing numbers. Similarly, all of the scarcer gulls of regular occurrence (Thayer's, Iceland, Lesser Black-backed, Glaucous, and Great Black-backed) were reported in lower numbers than normal. Since most Kittiwake records in Illinois are of immatures on the larger lakes, an **adult Black-legged Kittiwake** in Winnebago County was noteworthy. Carlyle Lake hosted the most extraordinary gulls of the season, including **Mew**, **Slaty-backed**, and **Glaucous-winged Gulls**, the latter present nearly all winter. Two additional records from Carlyle Lake remain under IORC review (**Western** and **Slaty-backed Gulls**).

Pigeons to Kinglets

Records of pigeons and doves were fairly routine although the rapidly expanding Eurasian Collared-Doves showed some impressive concentrations. There was no evidence of expansion in the Monk Parakeet population.

Owl populations were about normal for most species this season, but with some increase for Long-eared Owl and good distribution for Northern Saw-whet Owl. Five Snowy Owls were reported. Woodpecker numbers showed decreases overall, and in particular Red-headed Woodpecker continues to experience declines, although a tally of 23 Pileated Woodpeckers was above-average.

Two **Rufous Hummingbirds** were captured and banded by a licensed hummingbird bander within a half mile of each other in December and January in southern Illinois, the latter said to have been present since October.

Eastern Phoebes were found in typical scarcity, and were restricted almost entirely to the southern region. Loggerhead Shrikes were reported in fairly normal numbers, but were more widespread through the central and southern sections of the state. Northern Shrikes staged a massive and widespread incursion across the northern half of the state, as well as in many central Illinois locations; one was documented in southern Illinois in Lawrence County and another was found on the Missouri side of the Union Co CBC in far southern Illinois. Look for a future Meadowlark article on the record number of this species found in the state this season.

American Crow numbers were low, save for the large, traditional Danville roost. Horned Larks showed major concentrations at Carlyle Lake and McDonough County but somewhat reduced numbers over most of the state. A

Northern Rough-winged Swallow lingering in Richland County provided Illinois's first December record for this species.

Numbers for most of the chickadees, titmice, nuthatches, creepers, wrens, and kinglets were somewhat reduced over last winter, and particularly so for Carolina Chickadee, Brown Creeper, and Carolina Wren. By contrast, Red-breasted Nuthatches showed wide distribution and good numbers.

Thrushes to Sparrows

Thrush populations were unimpressive this season, with no noteworthy concentrations, although the always rare **Varied Thrush** and **Townsend's Solitaire** were located. A total of nine Gray Catbirds is among the highest ever recorded during the winter season and included three birds in nearby Chicago parks, while numbers for other mimids were weak. European Starling counts were also below those of most recent years.

American Pipits remained in strong numbers in southern Illinois well into December and even into early January. The wintering population of Cedar Waxwings was weak at best, with few reports after December.

Four species of warbler were reported this winter, including a photographed **Northern Waterthrush** lingering into early Dec. Yellow-rumped Warblers were in small numbers and went unreported over most of the state after December.

Eighteen species of sparrows were reported this season. Scarcer wintering species included a **Spotted Towhee** in far southern Illinois; **Chipping Sparrows** throughout the

season at five sites; Vesper Sparrow at two central Illinois locations; a **Lincoln's Sparrow** in northwestern Illinois; and **Harris's Sparrows** at three locations. Numbers for most species were fairly typical, with healthy numbers among the hardest species (American Tree Sparrow, Dark-eyed Junco, and Lapland Longspur) and the largest influx of Snow Buntings in over two decades. An impressive concentration of over 700 individuals of five species of sparrows was noted at the Union County Conservation Area on 29 December.

Blackbirds to Weaver Finches

No unexpected species of blackbirds were reported this season. Populations were mostly average to low, although a tally of **20 Western Meadowlarks** at Carlyle Lake in late February is among the highest of Illinois winter counts and a record high for southern Illinois. Rusty Blackbirds and Common Grackles showed some increase over last winter, while numbers for Red-winged Blackbirds and Eastern Meadowlarks were lower. All major concentrations of blackbirds were confined to southern Illinois.

Winter finches showed a noticeable influx this winter, with good numbers of Purple Finches and Pine Siskins and the largest invasion of Common Redpolls in fourteen years. One **Hoary Redpoll** was documented at Chicago. Numbers of American Goldfinches were down overall, although a tally at Rockford was the highest for winter in over a decade.

House Sparrow populations appear to be declining throughout Illinois, while Eurasian Tree Sparrows showed measurable increases in northwestern Illinois.

Acknowledgments

The foundation of this summary is the detailed information regarding wintering avian populations submitted to the compiler by field observers throughout the state. Maximum counts are provided, where available. Additional data reflecting the progress of the season are noted, when available, for species and areas of special interest.

I gratefully acknowledge and thank all the contributors who made this report possible. These observers are credited for each record, and cited observers are arranged here by initials/citation forms: Amar Ayyash, Cindy Alberico, David Antieau, Edward A. Anderson, Jill S. Anderson, Les Allen, Aaron Boone, Arlene E. Brei, Dale E. Birkenholz, Frank K. Bennett, H. David Bohlen, Joan Bruchman, Linda Boardsen, Lawrence G. Balch, Maurice Brucker, Margaret L. .....
 Information on counts greater than one individual, sexes, and/or ages of observed birds is included when available; no number indicates single birds. This information is followed by the location of the observation, date(s) of observation, and the observer(s). Noteworthy dates of occurrence, remarkably high counts, and/or locations for the state as a whole, or for particular regions of the state, are **underlined and boldfaced**. Headings for species of extremely unusual occurrence in Illinois during the winter are **CAPITALIZED**. Headings for species requiring review by the IORC are **CAPITALIZED AND UNDERLINED**. Records pending IORC review are enclosed in square brackets []; see forthcoming IORC reports in this journal for further details. The current IORC review list is available on-line at www.illinoisbirds.org/iorc.html.

Maximum counts are provided, where available, from each of the three regions of Illinois (north, central, and south) as mapped out in H. David Bohlen's 1978 *Annotated check-list of the birds of Illinois*. Representative high counts from subsections within these regions are included for many species. Additional data reflecting the progress of the season are noted, when available, for species and areas of special interest. The species accounts below follow the taxonomy and nomenclature of the 7th (1998) edition of the American Ornithologists' Union's *Check-list of North American Birds*, through its 48th (2007) Supplement. The 2003 DeLorme *Illinois Atlas & Gazetteer* has been used as a standard for spelling of place names for sites included therein.

Winter 2007-2008 Field Notes

*Trumpeter Swans
in Edgar County.*

23 February 2008.

Greater White-fronted Goose

MC: 3555, Chau, 4 Jan (RGB, SNB); 2000, Wayne & Richland Cos, 6 Feb (CLH); 1250, St. Clair Co, 27 Feb> (TJD); 1232, UCCA, 7 Jan (LW); 500, Embarras R (Coles Co), 23 Feb (LBH, RBr, DMT); 177, Spfld, 3 Jan (HDB, et al.); 40, Clinton L, 1 Jan (GSL, BG); 10, Rock Cut SP (Winnebago Co), 12 Jan (DTW, LGB); 6, Mercer Co, 21 Dec (KJM, TM). Reduced numbers overall.

Snow Goose

MC: 100,000, Carl.L., 21 & 26 Jan, 2 Feb (KAM, MS, DMK, m.ob.); 65,000, Ark., 27 Dec (JDC, JAS); 65,000, Rend L, 30 Dec (KAM, CJL, MS); 21,160, HLCA, 28 Dec (KJM, CAT); 15,000, Bald.L, 26 Jan (TJD); 13,830, UCCA, 29 Dec (KJM); 10,000, Meredosia NWR (Morgan Co), 9 Feb> (EWW). **Others** (central & north): 5544, Chau, 18 Jan (RGB, SNB); 4000, Sangamon Co, 8 Feb (KAM); 15, Modena (Stark Co), 12 Dec (EWW).

Ross's Goose

MC: 6, UCCA, 29 Dec (KJM); 6, Rend L, 30 Dec (KAM, MS, CJL); 4, Modena (Stark Co), 12 Dec (EWW); 4, Bald.L, 16 Feb (MST); 2, Edgar Co, 23 Feb> (EWW). **Others:** 3, Carl.L., 18 Feb (DMK); 2, Mermet L, 31 Dec (KJM); 2, Amax (Wabash Co), 7 Jan (CLH); Clinton L, 24 Dec (GSL); Homer L (Champaign Co), 18 Jan (EJC); East Fork L, 4 Feb (CLH). Low numbers.

Cackling Goose

MC: 1400, Evergreen L (McLean Co), 13 Dec (MJW); 200, Woodford Co, 10 Dec (MEF); 135, Bald.L, 7 Jan (KAM); 120, Carl.L., 22 Dec (DMK, MS); 120, St. Clair Co, 27 Feb> (TJD); 100, Spfld, 3 Jan (HDB, et al.); 50, Johnson Sauk Trail SP (Henry Co), 3 Dec (KAM). **Others:** 85, Rend L, 30 Dec (KAM, CJL, MS); 40, Ark., 27 Dec (DMK); 33, Monroe Co, 6 Feb (DJJ); 31, Fulton Co, 15 Dec (LLH); 20, LShel, 5 Jan (DMK, MFD); 17, HLCA, 28 Dec (KJM, CAT); 10, Cook Co, 3 Dec (KAM); 8, QC, 16 Dec (*KJM, SBH); 8, Mermet L, 31 Dec (KJM); 7, Jackson Co, 1 Jan (KJM, DM); 6, Urbana, 15 Dec (SDB, GSL); 5, Clinton L, 1 Jan (GSL, BG); 4, Rock R (Lee Co), 26 Dec (KJM, JDS, m.ob.); 4, Coffeen L SP (Montgomery Co), 10 Feb> (EWW); 3, Grayslake (Lake Co), 2 Dec (SDB, SLD).

Canada Goose

MC: 3161, Chau, 4 Jan (RGB, SNB); 2033, QC, 16 Dec (KJM, SBH, m.ob.); 1736, Mercer Co, 21 Dec (KJM, TM, m.ob.); 1693, Whiteside & Lee Cos, 26 Dec (KJM, JDS, m.ob.); 1572, JP, 25 Dec (PRC); 1500, UCCA, 29 Dec (KJM); 800, Carl.L., 1 Feb (DMK). **Others:** 1000, Cook Co, 3 Dec (KAM); 900, LShel, 5 Jan (DMK, MFD); 800, Logan Co, 12 Dec (KAM); 800, Monroe Co, 6 Feb (DJJ); 600, Bushnell (McDonough Co), 12 Jan (LJH). Low numbers reported.

Mute Swan

MC: 90, LCal, 3 Feb (WJM); 55, Channahon (Will Co), 6 Jan (UWG); 25, Peoria & Fulton Cos, 9 Jan (LLH); 4, HL, 10 & 18 Feb (FRH, KAM). **Others:** 19, Wauconda (Lake Co), 6 Dec (EWW); 12, JP, 12-13 Dec (PRC, PKD, KMC) & 1 Jan (PRC); 11, Chi (Belmont H); 5 Jan (DA); 9, Danville (Vermilion Co), 14 Dec (MPW, et al.); 3, L Charleston (Coles Co), 12 Dec (RBr, LBH).

Trumpeter Swan

MC: 40, Edgar Co, 23 Feb (EWW); 27, Union Co, 29 Dec (VMK, et al.); 11 (8 ad., 3 imm.), Miss. R (Whiteside & Carroll Cos), 18 Dec (*KJM, LB, *EAA); 9, L&D #14 (Rock Island Co), 24 Feb (SMF); 6, Trenton (Clinton Co), 5 Jan (KAM); 5 (2 ad., 3 imm.), Randolph Co CA (Randolph Co), 14-20 Jan (*CD, PD, JbD, m.ob.); 5, L Charleston (Coles Co), 15-20 Feb (RBr, LBH, m.ob.). **Others:** Downs (McLean Co), 6 Dec (MEF); imm., Hillery (Vermilion Co), 14 Dec (MJE, BLr).

Tundra Swan

MC: 68, Chau, 4 Jan (RGB, SNB); 40, Wabash Co, 9 Feb (RES, CLH); 6, Miss. R (Rock Island Co), 8-16 Dec (SMF); 6 (ad.), L&D #13 (Whiteside Co), 25 Dec (EWW). **Others:** Edgar Co, 7 Dec (EWW); imm., West Branch FP (Du Page Co), 9 Dec (MAM, UWG); Wauk., 26 Dec (EWW).

Wood Duck

MC: 9, Spfld, 3 Jan (HDB, et al.); 4 (3 male, 1 female), New Athens (St. Clair Co), 24 Feb> (TJD); 3, McLean Co, 6 Jan (MJW); 3, Amax (Wabash Co), 19 Feb (CLH). **Others** (north): female, Cordova (Rock Island Co), 20 Dec (KJM); male, Rock Island Co, 22 Dec (KJM, SBH); male, Montrose H, 31 Dec (LM). Ones and twos at a few additional southern sites.

Gadwall

MC: 1580, UCCA, 29 Dec (KJM); 250, Mermet L, 31 Dec (KJM); 141, Spfld, 3 Jan (HDB, et al.); 130, HL, 18 Feb (KAM); 45, Clinton L, 1 Jan (GSL, BG); 23, Chau, 11 Jan (RGB, SNB); 12, Wauk., 1 Jan (GAW); 6, La Salle L, 7 Jan (CKM, JDM). Less abundant and widespread.

American Wigeon

MC: 268, UCCA, 29 Dec (KJM); 105, Rend L, 30 Dec (KAM); 4, Wauk., 1 Jan (GAW). **Others:** 16, Clinton L, 1 Jan (GSL, BG); 12, Mermet L, 31 Dec (KJM); 11, Ark., 27 Dec (KJM, RMR); 6, Carl.L., 1 Dec (DMK); male, LCal, 24 Dec (WJM); Windfall L (Vermilion Co), 12 Dec (SDB), Chau, 18 Jan (RGB, SNB); HL, 28 Jan (FRH).

American Black Duck

MC: 147, Rend L, 30 Dec (KAM, CJL, MS); 63, La Salle L, 7 Jan (CKM, JDM); 52, HLCA, 28 Dec (KJM, CAT); 42, UCCA, 29 Dec (KJM); 19, Chau, 11 Jan (RGB, SNB); 17, LCal, 24 Dec (WJM); 15, Harrison (Winnebago Co), 6 Jan (DTW, BCW).

Mallard

MC: 13,010, Chau, 7 Dec (RGB, SNB); 10,000, Carl.L., 8 Dec (DMK); 5300, Rend L, 30 Dec (KAM, CJL, MS); 1600, La Salle Co, 26 Jan (GAW); 740, LCal, 19 Jan (WJM); 528, Port Louisa NWR, 21 Dec (KJM, TM). **Others:** 4405, UCCA, 29 Dec (KJM); 3500, Lenzburg (St. Clair Co), 13 Dec (TJD); 2000, Wayne & Richland Cos, 6 Feb (CLH); 792, Mermet L, 31 Dec (KJM); 678, QC, 16 Dec (TM, BL, m.ob.); 510, Whiteside & Lee Cos, 26 Dec (CK, TG, m.ob.); 400, Montgomery Co, 12 Dec (KAM). Wintering population continues to decline, especially in south. **Hybrid:** Mallard/American Black Duck, Danville (Vermilion Co), 14 Dec (SDB).

Harlequin Duck and two Common Goldeneye. North Avenue Beach, Chicago, Cook County. 3 January 2008.
Photo by Greg Neise.

Blue-winged Teal

female, Carl.L., 9 Dec (*DMK); female, Winthrop H., 18 Dec (EWW).

Northern Shoveler

MC: 165, HL, 29 Dec (FRH); 120, Carl.L., 18 & 29 Dec, 1 Jan (KAM, DMK, MS); 75, HLCA, 28 Dec (KJM, CAT); 11, Port Louisa NWR, 21 Dec (KJM). **Others** (central & north): 8, L. Vermilion (Vermilion Co), 14 Dec (MJE); 2, Chau, 4 Jan (RGB, SNB); male, Evanston (Cook Co), 26 Dec (EWW). Reduced numbers outside so. IL.

Northern Pintail

MC: 1000, Wayne & Richland Cos, 6 Feb (CLH); 600, Carl.L., 24 Feb (DMK); 400, Monroe Co, 6 Feb (DJJ); 400, Swan L (Calhoun Co), 9 Feb (EWW); 31, Lincoln (Logan Co), 22 Dec (EWW); 20, Whalon L FP (Will Co), 16 Dec (UWG). **Others** (central & north): 12, L. Vermilion (Vermilion Co), 14 Dec (MPW, MJE); 7, Chau, 18 Jan (RGB, SNB); 2, La Salle L, 7 Jan (CKM, JDM); Rock R (Lee Co), 26 Dec (KJM, JDS). Rather low numbers, as last winter.

Green-winged Teal

MC: 430, Chau, 13 Dec (RGB, SNB); 352, Rend L, 30 Dec (KAM, MS, CJL); 69, UCCA, 29 Dec (KJM); 40, Carl.L., 8 Dec (DMK); 5 (3 male, 2 unk.), Winthrop H., 5 Dec (EWW); 3, Whalon L FP (Will Co), 27 Dec (UWG); 2, Windfall L (Vermilion Co), 12 Dec (SDB). Less widespread, but more plentiful in the south.

Canvasback

MC: 900, HL, 18 Feb (KAM); 400, Carl.L., 24 Feb (DMK); 85, Rend L, 30 Dec (KAM, CJL, MS); 38, Chau, 8 Feb (RGB, SNB); 34, Spfld, 3 Jan (HDB, et al.); 33, Miss. R (Rock Island Co), 20 Dec (KJM); 4, Whalon L FP (Will Co), 16 Dec (UWG).

Redhead

MC: 60, HL, 18 Feb (KAM); 50, Winthrop H, 26 Jan (RDH); 25, Rend L, 30 Dec (KAM, MS, CJL); 25, Chi, 6 Jan (GAW); 11 (10 male, 1 female), JP, 17 Feb (PRC); 8, East Fork L, 22 Feb (CLH). Continued low numbers.

Ring-necked Duck

MC: 3125, UCCA, 29 Dec (KJM); 1800, Ark., 27 Dec (JDC, JAS); 1500, HLCA, 28 Dec (KJM, CAT); 200, Whalon L FP (Will Co), 16 Dec (UWG); 68, Mason Co, 8 Feb (RGB, SNB). **Others** (central & north): 8, Port Louisa NWR, 21 Dec (KJM); 7, L&D #14 (Rock Island Co), 16 Dec (KJM, SBH); 2, Chi, 25 Dec (GAW); 2, Wauk., 1 Jan (GAW). Less common and widespread statewide.

Greater Scaup

MC: 410, IBSP, 1 Jan (GAW); 300, JP, 13 Jan (KMC); 60, Carl.L., 9 Dec (DMK); 6, Rend L, 30 Dec (DMK); 4, Rock Cut SP (Winnebago Co), 12 Jan (DTW, BCW). **Others** (away from L Michigan): 2, East Fork L, 13 Dec (CLH); HL, 15 Dec (FRH); male, Miss. R (Rock Island Co), 20 Dec (*KJM); Jasper Co, 21 Dec (CLH); 4, Spfld, 3 Jan (HDB, et al.); male, Bald.L., 16 Feb (TJD). Far less numerous this winter, especially on L Michigan.

Lesser Scaup

MC: 500, LCal, 19 Feb (WJM); 400, Carl.L., 1 Dec (DMK); 97, UCCA, 29 Dec (KJM); 17, Miss. R (Rock Island Co), 16 Dec (KJM, SBH, m.ob.); 14, Chau, 8 Feb (RGB, SNB). **Others:** 45, HL, 18 Feb (KAM); 40, Rend L, 30 Dec (DMK); 10, Winthrop H., 9 Feb (KAM). Wintering population has greatly declined.

HARLEQUIN DUCK

Fem., Chi (Burnham H), 6 Dec (DFS); ad. male, Chi, 8 Dec – 5 Jan (MAM, GAW, m.ob.).

Surf Scoter

L Spfld (Sangamon Co), 2-22 Dec (HDB); 3, L Shel (Moultrie Co), 8 Dec (TAM); 14, Montrose H, 28 Feb (DA).

White-winged Scoter

MC: 18, East Fork L, 29 Feb (CLH); 15, Montrose H, 28 Feb (DA); 9, L Charleston (Coles Co), 23 Feb (LBH, m.ob.); 3, L Arlington, Arlington Heights (Cook Co), 1-3 Dec (DBJ, KAM, m.ob.); 3, Wilmette (Gillson Pk) (Cook Co), 8 Dec (JRS, et al.); 3, North Point Marina (Lake Co), 23 Feb (DTW, BCW); 2, Highland Park (Lake Co), 10 Dec (DRD); . **Others:** 1st yr, LCal, 17 & 23 Feb (*WJM, RLS, BS, FS); male, Carl.L., 22-26 Feb (*DMK); L Spfld (Sangamon Co), 28 Feb (HDB). Larger numbers overall after impressive numbers and distribution earlier in the fall season throughout the state.

Black Scoter

L Spfld (Sangamon Co), 2-9 Dec (HDB); 2 (female), Carl.L., 26 Dec (DMK, JDC); East Fork L, 15 Dec (CLH).

Long-tailed Duck

MC: 3 (2 male, 1 unk.), IBSP, 31 Dec (EWW); 3, Montrose H, 31 Dec (LM). **Others:** female, Edgar Co, 7 Dec-23 Feb (*EWW); female, West Branch FP (Du Page Co), 9 & 15 Dec (UWG, MAM); female, L & D 14 Miss. R (Rock Island Co), 10 Dec & 10 Feb (SMF); ad. male, Bloomington (McLean Co), 11-19 Dec (MJW); male, Carl.L., 15-31 Dec (KAM, *DMK, MS); female, East Fork L, 6-7 Jan (CLH). Lower numbers this winter, but with wide distribution.

Bufflehead

MC: 72 (33 male, 39 unk.), Winthrop H., 5 Dec (EWW); 60, Carl.L., 1 Dec (DMK); 39, JP, 12 Dec (PRC); 23, Chi, 25 Dec (GAW); 22, Chau, 7 Dec (RGB, SNB); 14, Rend L, 30 Dec (KAM); 5 (1 male, 4 female), Miss. R (Rock Island Co), 22 Dec (KJM, SBH). Up to five birds at scattered sites elsewhere.

Common Goldeneye

MC: 787, Miss. R (Rock Island Co), 16 Dec (KJM, SBH); 600, Carl.L., 26 & 29 Dec (DMK, MS); 560, Chi, 25 Dec (GAW); 500, Rend L, 2 Jan (KAM, CJL); 194, Chau, 11 Jan (RGB, SNB). **Others:** 106, Rock R (Lee Co), 26 Dec (KJM, JDS, m.ob.); 102, Miss. R (Whiteside Co), 18 Dec (KJM, LB); 91, LCal, 3 Feb (WJM); 80, HL, 18 Feb (KAM). Low numbers this winter.

Hooded Merganser

MC: 200, Carl.L., 1-2 Dec (DMK); 167, Spfld, 3 Jan (HDB, et al.); 152, Chau, 8 Feb (RGB, SNB); 60, Rend L, 30 Dec (KAM, MS, CJL); 28, L. Vermilion (Vermilion Co), 14 Dec (MPW, SDB, SLD); 20, Evanston (Cook Co), 16 Dec (EWW); 20 (7 male, 13 unk.), Winthrop H., 20 Dec (EWW); 6, Seneca (La Salle Co), 3 Feb (CKM, JDM).

Common Merganser

MC: 15,000, La Salle L, 7 Jan (CKM, JDM); 1400, Carl.L, 27 Jan & 1-2 Feb (DMK, MS, BR); 954, Chau, 22 Feb (RGB, SNB); 750, HL, 25 Feb (FRH); 574, Chi, 25 Dec (GAW); 155, Miss. R (Rock Island Co), 22 Dec (KJM, SBH). More numerous, especially in central and south.

Red-breasted Merganser

MC: 2628, Chi, 25 Dec (GAW); 300, Carl.L, 2 Dec (DMK). **Others:** 16, Rend L, 30 Dec (KAM, CJL, MS); 12, L Vermilion (Vermilion Co), 14 Dec (SDB, SLD); 7 (male), East Fork L, 18 Feb (CLH); 6, Bald.L, 16 Feb (TJD); 3, La Salle L, 7 Jan (CKM, JDM); 2 (male), Beall Woods SP (Wabash Co), 19 Feb (CLH); HL, 10 Dec< (FRH); female, L&D #13 (Whiteside Co), 18 Dec (*KJM, LB); DeWitt Co, 1 Jan (EJC).

Ruddy Duck

MC: 305, UCCA, 29 Dec (KJM); 200, Rend L, 30 Dec (DMK); 150, Carl.L, 18 Feb (DMK); 86, Chau, 7 Dec (RGB, SNB). **Others:** 110, HL, 18 Feb (KAM); 100, Mermet L, 31 Dec (KJM); 88, Spfld, 3 Jan (HDB, et al.); 81, L Vermilion (Vermilion Co), 14 Dec (MJE, SDB, SLD); 20, East Fork L, 8 Dec (EWW); 5 (female), L&D #14 (Rock Island Co), 16 Dec (KJM, SBH); 2, Chi, 2 & 5 Dec (GAW); 2, West Branch FP (Du Page Co), 15 Dec (UWG); 15 Jan (male), JP (PRC); Winthrop H., 26 Jan-9 Feb (KAM, WJM). More plentiful than in recent winters in central and south.

Gray Partridge

Rock Island Co, 20 Dec (KJM).

Ring-necked Pheasant

MC: 30, Earlville (LaSalle Co), 12 Feb (MAM); 16 (female), Afton FP (DeKalb Co), 3 Feb (EWW); 13, Kankakee (Kankakee Co), 23 Feb (EWW); 7, Green R WA (Lee Co), 26 Dec (KJM, JDS, m.ob.); 5, Rend L, 30 Dec (KAM, MS, CJL). **Others:** 5, Carroll Co, 18 Dec (KJM, LB); 2, Rock Island Co, 5 Jan (CM, JM); Carl.L, 18 Dec (DMK); Mercer Co, 21 Dec (WAB); LShel, 5 Jan (DMK, MFD).

Greater Prairie-Chicken

45, Prairie Ridge SNA (Jasper Co), 21 Dec (JWW, et al.).

Wild Turkey

MC: 336, La Salle Co, 7 Jan (CKM, JDM); 106, Whiteside & Carroll Cos, 18 Dec (DGW, EAA, RN, m.ob.); 75, Bald.L, 16 Feb (TJD); 71, Edwards Co, 24 Jan (RES); 15, Mercer Co, 21 Dec (KJM, TM). **Others:** 79, Oregon (Ogle Co), 23 Dec (EWW, DTW); 60, Carl.L, 9 & 23 Dec (DMK, MS); 60, Rend L, 30 Dec (DMK); 56, Clinton L, 1 Jan (GSL, BG); 45, Randolph Co, 27 Dec (KJM, RMR); 38, Rockfd, 29 Dec (DTW, BCW); 31, QC, 16 Dec (KJM, SBH); 30, Boone Co, 25 Feb (AEB); 27, Rock Island Co, 22 Dec (KJM, SBH); 22, Middlefork SF&WA (Vermilion Co), 14 Dec (MPW); 13, Newton (Jasper Co), 8 Dec (EWW); 5, Jo Daviess Co, 24 Dec (EWW); 4, Batchtown WA (Calhoun Co), 9 Feb (EWW).

Northern Bobwhite

MC: 36, Mercer Co, 21 Dec (KJM, TM, WAB); 19, Edwards Co, 25 Dec (RES); 14, Rock Island Co, 5 Jan (CM, JM, m.ob.); 12, Madison Co, 8 Dec (KAM); 12, Carl.L, 19 Jan (DMK). **Others:** 9, Alexander Co, 28 Dec (JDC); 8, Whiteside Co, 20 Dec (EAA); 6, Peabody WA (St. Clair Co), 10 Feb (EWW); 2, Green R WA (Lee Co), 26 Dec (KJM, JDS, m.ob.).

Red-throated Loon

3, Carl.L, 1 Dec (*DMK); L Spfld (Sangamon Co), 9-13 Dec (HDB); 3, North Point Marina (Lake Co), 23 Feb> (DTW, BCW).

PACIFIC LOON

HL, 9 Dec< (FRH).

Common Loon

MC: 12, Carl.L, 1-2 Dec (DMK). **Others:** 2, HL, 8 Dec (KAM); Evanston (Cook Co), 11 Dec (MC); L Vermilion (Vermilion Co), 14 Dec (MJE); Rend L, 30 Dec (DMK); L Spfld (Sangamon Co), 1 Jan (HDB).

Pied-billed Grebe

MC: 72, East Fork L, 3 Feb (CLH); 39, Spfld, 3 Jan (HDB, et al.); 25, Kinkaid L (Jackson Co), 1 Jan (KJM, DM); 16, Bald.L, 3 Feb (DMK); 3, LCal, 19 & 23 Feb (WJM); 2, Chau, 4 Jan (RGB, SNB). **Others:** 10, Rend L, 2 Jan (KAM, CJL); 4, HLCA, 28 Dec (KJM, CAT); 3, HL, 8 Dec (KAM); 3, L Vermilion (Vermilion Co), 14 Dec (MJE, SDB, SLD); 2, Carl.L, 1 Dec (DMK); West Branch FP (Du Page Co), 9 Dec (UWG); Wauk., 1 Jan (GAW); La Salle L, 7 Jan (CKM, JDM).

Horned Grebe

MC: 175, Bald.L, 27 Jan (KAM); 12, Rend L, 30 Dec (KAM, CJL, MS); 9, East Fork L, 27 Dec (CLH); 7 & 6, L Vermilion (Vermilion Co), 7 & 14 Dec (EWW & MPW, SDB, SLD). **Others** (outside south): Chi, 2 Dec-14 Jan (GAW). Increased numbers in south.

Red-necked Grebe

L Spfld (Sangamon Co), 29 Dec – 2 Jan (HDB); imm., Bald.L, 26-27 Jan & 16 Feb (TJD, KAM, MS, *MST).

Eared Grebe

East Fork L, 26-27 Feb (CLH).

WESTERN GREBE

Chi, 4-7 Dec (SB, GAW, GN ph, et al.).

American White Pelican

MC: 187, Miss. R (Madison Co), 9 Feb (LW); 95, Bald.L, 27 Feb> (TJD); 80, Carl.L, 23 Feb (DMK). **Others** (outside south): Miss. R (Carroll Co), 18 Dec (*EAA); 2, Miss. R (Rock Island Co), 22 Dec (*KJM, SBH); Spfld (Sangamon Co), 5-7 Feb (HDB); L&D #13 (Whiteside Co), 24 Feb (UWG); Chau, all winter (RGB, SNB). Lower numbers this winter.

Double-crested Cormorant

MC: 80, Carl.L, 1 Dec (DMK); 27, La Salle L, 7 Jan (CKM, JDM); 20, Miss. R (Rock Island Co), 16 Dec (KJM, SBH, m.ob.); 15, Rend L, 2 Jan (KAM, CJL); 6, LCal, 1 Jan (WJM); 5, Chau, 7 Dec (RGB, SNB).

Great Blue Heron

MC: 70, Carl.L, 18 Dec (DMK); 52, Spfld, 3 Jan (HDB, et al.); 28, QC, 16 Dec (KJM, SBH, m.ob.); 25, L Vermilion (Vermilion Co), 14 Dec (SDB, SLD); 24, HL, 1 Jan (FRH); 14, Chau, 7 Dec (RGB, SNB); 9, Miss. R (Rock Island Co), 22 Dec (KJM, SBH); 4, Champaign Co, 15 Dec (EJC). Less numerous and less widespread this season.

Black-crowned Night-Heron

MC: 20, Granite City (Madison Co), 14-29 Feb (FRH, m.ob.). **Others:** imm., Evanston (Cook Co), 26 Dec (EWW).

Black Vulture

MC: 180, Massac Co, 13 Jan (FKB). **Others:** 4, Rosiclair (Hardin Co), 9 Dec (EWW); 3, Pulaski Co, 28 Dec (JDC, JAS); 2, Alexander Co, 28 Dec (KJM, CAT); 2, Carbondale (Jackson Co), 14 Jan (LW).

Turkey Vulture

MC: 127, Massac Co, 10 Jan (FKB); 71, Sam Parr SP (Jasper Co), 29 Dec (CLH); 51, Alexander Co, 28 Dec (KJM, CAT); 48, Carl.L, 26 Dec (DMK). **Others** (outside southern Illinois): 25, Vermilion Co, 14 Dec (SDB, SLD et al); 21, Spfld, 3 Jan (HDB, et al.); 12, Effingham Co, all winter (TZ); Barrington & Hoffman Estates (Cook Co), 27 Jan (JB, et al.); Woodford Co, 17 Feb> (MEF).

Bald Eagle

MC: 1032 (518 ad., 442 imm., 72 unk.), Miss. R (Whiteside & Rock Island Cos), 12 & 13 Dec (KJM); 891 (483 ad., 408 imm.), Miss. R

(Whiteside & Carroll Cos), 18 Dec (KJM, LB, m.ob.); **517** (275 ad., 221 imm., 21 unk.), Miss. R (Mercer Co), 14 Jan (KJM); 78, Utica (La Salle Co), 5 Jan (DTW, BCW); 35 (13 ad., 22 imm.), Chau, 7 Dec & 22 Feb (RGB, SNB); 14 (8 ad., 6 imm.), Carl.L., 21 Jan (KAM, DMK); 10 (4 ad., 6 imm.), Ohio R (Massac Co), 31 Dec (KJM). **Others** (away from counties bordering the Miss. R): 6 (2 ad., 4 imm.), Rend L, 30 Dec (KAM, MS, CJL); 4 (2 ad., 2 imm.), East Fork L, all winter (CLH); 4 (2 ad., 2 imm.), L Vermilion (Vermilion Co), 7 & 14 Dec (EWW & MPW m.ob.); 4 (ad.), Goose L Prairie SNA (Grundy Co), 21 Dec (EWW); 2 (pr), LCal, all winter (WJM); 2 (1 ad., 1 imm.), Amax (Wabash Co), 9 Feb (CLH); 2 (1 ad., 1 imm.), Kishwaukee R (Boone Co), 15 Feb (AEB); ad., McKinley Woods (Will Co), 1 Dec (JAJ); ad., Zion (Lake Co), 9 Feb (WJM, CA, SF, WSS). Good numbers along Miss. R, but fewer reports from central and south.

Northern Harrier

MC: **36**, Prairie Ridge SNA (Jasper Co), 21 Dec (JWW, et al.); **30**, Ark., 27 Dec (JDC, JAS); 8, Carl.L., 1 Dec (DMK); 8, Rock Island Co, 5 Jan (KJM, JDC, JAS, m.ob.); 7, McLean & Woodford Cos, 30 Dec (MEF); 5, LShel, 5 Jan (DMK, MFD); 4, Champaign Co, 15 Dec (SDB, GSL); 4 (3 ad. male, 1 unk.), Goose L Prairie SNA (Grundy Co), 21 Dec (EWW).

Sharp-shinned Hawk

MC: 2, Carroll Co, 18 Dec (KJM, LB); 2, Carl.L., 18 Dec & 13 Jan (KAM, DMK); 2, Rock Island Co, 20 Dec (KJM); 2, Jackson Co, 1 Jan (KJM, DM). Widespread as singles.

Cooper's Hawk

MC: **17**, Rockfd, 15 Dec (DTW, BCW); 5, Whiteside & Carroll Cos, 26 Dec (AT, ET, m.ob.); 4, Ark., 27 Dec (DMK); 4, LCal, 29 Dec (WJM, MLB, CDH, WSS); 4, Rend L, 30 Dec (KAM, CJL, MS); 4, Clinton L, 1 Jan (GSL, BG); 3, Massac Co, 31 Dec (KJM); 3, Bushnell (McDonough Co), all winter (LLH). Some increases; up to 4 birds at other sites in north, ones and twos elsewhere.

Northern Goshawk

Lawrence Co., 4 Dec (RES, CLH); ad., Naperville (DuPage Co), 25 Jan (JAS); imm., Woodford Co, 24 Feb (MEF).

Red-shouldered Hawk

MC: 22, UCCA, 29 Dec (KJM); 11, Mermet L, 31 Dec (KJM); 3, Randolph Co, 27 Dec (KJM, RMR). **Others** (central & north): Johnson Sauk Trail SP (Henry Co), 3 Dec

(KAM); Kennekuk CP (Vermilion Co), 14 Dec (MJE); Depue (Burcau Co), 16 Dec (DJS, TW); Whiteside Co, 18 Dec (KJM, LB); Urbana, 23 Dec (EJC); Libertyville (Lake Co), 26 Dec (JSS); Green R WA (Lec Co), 26 Dec (KJM, JDS, m.ob.); imm., LCal, 29 Dec (WJM, MLB, CDH, WSS); Waterfall Glen FP (Du Page Co), 29 Dec (UWG); Chau, 4 Jan-29 Feb (RGB, SNB); Shabbona L SP (DeKalb Co), 3 Feb (DJS).

Red-tailed Hawk

MC: **123**, Ogle & Winnebago Cos, 29 Dec (DTW, BCW); 45, McLean & Woodford Cos, 24 Feb (MEF); 33, Whiteside & Lee Cos, 26 Dec (AT, ET, m.ob.); 23, Perry & Randolph Cos, 27 Dec (KJM, RMR); 19, Mercer Co, 21 Dec (KJM, TM, m.ob.); 18, LCal, 29 Dec (WJM, MLB, CDH, WSS); 14, Rend L, 30 Dec (KAM, CJL, MS). **Others:** "Harlan's Hawk", HL, 5 & 27 Jan (FRH); imm. "Western", La Salle Co, 28 Jan-29 Feb (CKM, JDM). Greater numbers reported in north.

Rough-legged Hawk

MC: 13, Whiteside & Carroll Cos, 18 Dec (KJM, LB, m.ob.); 13, Goose Lake Prairie SP (Grundy Co), 14 Feb (REF); 7 (6 dark morph), Jo Daviess Co, 24 Dec (EWW); 7, McLean & Woodford Cos, 30 Dec (MEF); 6, IBSP, 1 Jan (GAW); 6, South Barrington (Cook Co), 29 Jan (JB, et al.); 4, Rollins Sav, 23 Feb (BSr); 4, Wauk, 1 Jan (RB); 4, McDonough & Hancock Cos, 4 Jan (LLH); 2 (1 light, 1 dark morph), Ferrin (Clinton Co), 18 Dec (DMK). **Others** (south): Crawford Co, 8 Dec (CLH); Equality (Gallatin Co), 9 Dec (EWW); Richland Co, 18 Dec (CLH); Ark., 27 Dec (KJM, RMR); Carl.L., 3 Feb (KAM).

Golden Eagle

Imm., Kickapoo SP (Vermilion Co), 13 Dec (SDB); ad., L&D #13 (Whiteside Co), 18 Dec (*KJM, LB); ad., Forcst Glen Preserve (Vermilion Co), 26 Dec (MFC, MJE, VB); QC, 15 Jan (RWM); ad., Lake Villa (Lake Co), 30 Jan (RB).

American Kestrel

MC: 15, Monroe Co, 20 Feb (DJJ); 14, McLean & Woodford Cos, 13 Jan (MEF); 13, Carl.L., 4 Feb (KAM); 12, Mercer Co, 21 Dec (CM, JM, m.ob.); 12, Whiteside & Lec Cos, 26 Dec (KJM, JDS, m.ob.); 12, Rock Island Co, 5 Jan (CM, JM, m.ob.); 9, LCal, 29 Dec (WJM, MLB, CDH, WSS).

Merlin

MC: 2, Kankakee, 12 Dec-3 Feb & 6-13 Dec resp (JBH, BRf); 2, Rockfd, 29 Dec (DTW, BCW). **Others:** Piatt Co, 3 Dec (KAM); Champaign Co, 16 Dec (EJC); female, IBSP, 18 Dec-18 Feb (*EWW); JP,

Gray Catbird at Millennium Park, Chicago, Cook County. 19 December 2007. Photo by Craig Thayer.

Mahomet (Champaign Co), **1 Feb** (RD); Shabbona L SP (DeKalb Co), **3 Feb** (*DJS). Unusually large number of records this season.

Northern Mockingbird

MC: 6, Massac Co, 31 Dec (KJM); 3, Carl.L, 26 Dec (DMK); 2, St. Clair Co, 23 Dec (KAM); 2, Ark., 27 Dec (DMK); 2, Rock Island Co, 5 & 15 Jan (TM, WZ, SMF, m.ob.); 2, McDonough Co, 12 Jan (LLH). **Others** (central & north): La Salle Co, 1 & 10 Jan (CKM, JDM); Putnam Co, 20 Jan & 18 Feb (DJS); Knox Co, 16 Feb (PR, DJM). Modest numbers.

Brown Thrasher

MC: 7, UCCA, 29 Dec (KJM); 3, Massac Co, 31 Dec (KJM). **Others:** Grundy Co, 1 Dec (JAJ); Carl.L, 8 & 22 Dec (DMK, EWW); Beall Woods SP (Wabash Co), 22 & 27 Dec (CLH); Olney (Richland Co), 1 & 19 Jan, 3 Feb (CLH); LShel, 5 Jan (DMK, MFD); Red Hill SP (Lawrence Co), 5 Jan (CLH); Washington Co CA (Washington Co), 20 Jan (MS); Evergreen L (McLean Co), 2 Feb (MEF); Monroe Co, 24 Feb > (CD, PD).

European Starling

MC: **10,950**, Alexander Co, 28 Dec (KJM, CAT); 8000, Carl.L, 9 & 22 Dec (DMK, MS); 3000, Summit (Cook Co), 16 Dec (WJM, WSS, CDH, AA); 2316, Whiteside & Lee Cos, 26 Dec (AT, ET, m.ob.); 2048, Mercer Co, 21 Dec (KJM, TM, m.ob.); 691, Du Page Co, 15 Dec (GAW); 575, Massac Co, 31 Dec (KJM); 500, LShel, 5 Jan (DMK, MFD); 481, Lake Co, 1 Jan (GAW).

American Pipit

MC: **120**, Union Co, 29 Dec (VMK, et al.); **80**, Carl.L, 15 Dec (DMK); 20, Jasper Co, 5 Dec (CLH). **Others:** 18, Lenzburg (St. Clair Co), 15 Dec < (TJD); 18, Amax (Wabash Co), 4 Jan (CLH); 14, Urbana, 15 Dec (SDB, GSL); 13, Lawrence Co, 8 Dec (CLH); 11, East Fork L, 15 Dec (CLH); 2, West Salem (Edwards Co), 8 Dec < (EWW); Edgar Co, 7 Dec < (EWW); Chi, 15 Dec < (EWW); Wauk, 22 Dec (AFS, et al.). Largest numbers confined to the south.

Cedar Waxwing

MC: 301, Lake Forest (Lake Co), 14 Jan (JSS); 220, Carl.L, 9 Dec (DMK); 217, Palos (Cook Co), 16 Dec (WJM, WSS, CDH, AA); 185, Clinton L, 1 Jan (GSL, BG); 158, Du Page Co, 15 Dec (UWG); 93, Champaign Co, 15 Dec (EJC, m.ob.); 25, Mercer Co, 21 Dec (KJM, TM). **Others** (post-December): 14, Olney (Richland Co), 1 Jan (CLH);

Oak Brook (DuPage Co), 15 Jan (CS); 12, Bald.L, 3 Feb (DMK); 5, Starved Rock SP (La Salle Co), 16 Feb (CKM, JDM).

ORANGE-CROWNED WARBLER

Clinton L, 1 Jan (GSL, BG); imm, Spfld, 3-16 Jan (RLJ, HDB ph).

Yellow-rumped Warbler

MC: 12, Carroll Co, 18 Dec (KJM, LB); 12, Carl.L, 18 Dec (DMK); 11, Perry & Randolph Cos, 27 Dec (KJM, RMR); 6, Champaign Co, 15 Dec (EJC, SDB, GSL); 6, Mercer Co, 21 Dec (KJM, TM); 4, Mundelein (Lake Co), 1 Dec (SDB, SLD); 4, Waterfall Glen FP (Du Page Co), 29 Dec (UWG); 4, Vermilion Co, 14 Dec (MJE, et al.); 2, Lakewood FP (Lake Co), 3 Dec (SDB); 2, White Pines SP (Ogle Co), 25 Dec (EWW). **Others** (post-December): 3, Richland Co, 12 Jan (CLH); HL, 27 Jan (FRH); St. Clair Co, 31 Jan (KAM); River Forest (Cook Co), 24 Feb > (JSA).

PINE WARBLER

L Murphysboro SP (Jackson Co), **1 Jan** (*KJM, DM).

NORTHERN WATERTHRUSH

Lincoln Pk (South Pond), 3-4 Dec (GNph).

SPOTTED TOWHEE

Massac Co, 31 Dec (*KJM).

Eastern Towhee

MC: **17**, Massac Co, 31 Dec (KJM); 10, Middlefork SF&WA & Kennekuk CP (Vermilion Co), 12 Dec (SDB); 6, Perry & Randolph Cos, 27 Dec (KJM, RMR); 6, Pulaski Co, 28 Dec (JDC, JAS); 5, Forest Glen (Vermilion Co), 19 Dec (EJC). **Others** (central & north): Boone Co, 5 Dec (AEB). Up to 4 birds noted at other southern sites.

Northern Waterthrush at Lincoln Park Zoo. 4 December 2007. Photo by Greg Neise.

American Tree Sparrow

MC: **628**, McDonough & Fulton Cos, 15 Dec (LLH); 552, Du Page Co, 15 Dec (GAW); 457, Rock Island Co, 20 Dec (KJM, EAA); 300, Carl.L, 18 Dec (DMK); 260, Mercer Co, 21 Dec (KJM, TM, m.ob.); 130, Merwin Nature Preserve (McLean Co), 17 Dec (MEF); 125, Ark., 27 Dec (DMK). **Others:** 394, Whiteside & Lee Cos, 26 Dec (KJM, JDS, m.ob.); 379, Whiteside & Carroll Cos, 18 Dec (KJM, LB, m.ob.); 187, LCal, 29 Dec (WJM, MLB, CDH, WSS); 85, LShel, 5 Jan (DMK, MFD); 81, Nachusa Grasslands (Lee Co), 23 Dec (EWW); 67, Monroe Co, 20 Feb (DJJ). Good numbers largely confined to December.

Chipping Sparrow in Urbana, Champaign County. 16 December 2007. Photo by Greg Lambeth.

CHIPPING SPARROW

Urbana, 4 Dec (EJC); Urbana, 16 Dec (GSL ph); Carl.L., 8 Dec (*DMK); North Chicago (Lake Co), 1 Jan (RB); Kankakee, 12 Feb (BRfph).

Field Sparrow

MC: 37, Massac Co, 31 Dec (KJM); 25, UCCA, 29 Dec (KJM); 7, Rock Island Co, 5 Jan (*CM, JM, *KJM); 6, Champaign Co, 15 Dec (EJC, et al.); 4, Mercer Co, 21 Dec (JM, *CM). One to ten birds at a few additional southern sites.

Vesper Sparrow

Cooper Twp (Sangamon Co), 8 Dec (HDB); Towanda (McLean Co), 15 Dec (MR, et al.).

Savannah Sparrow

MC: **55**, Carl.L., 3 Feb (KAM); 15, Lenzburg (St. Clair Co), 9 Feb (TJD); 6, Rend L., 30 Dec (KAM, MS, CJL); 5, Rockfd, 15 Dec (DTW, BCW); 2, Champaign Co, 15 Dec (EJC). **Others** (north & central): Domnellson (Montgomery Co), 21 Dec (EWW); Kingdom (Lee Co), 23 Dec (*EWW); Chi, 25 Dec (GAW); Maywood (Cook Co), 27 Jan (JSA). Widely distributed this winter.

Le Conte's Sparrow

2, Ark., 27 Dec (DMK); Lenzburg (St. Clair Co), 12 Jan (TJD).

Fox Sparrow

MC: 18, Urbana, 15 Dec (EJC, et al.); 15, Mundelcin (Lake Co), 1 Dec (SDB, SLD); 8, Jasper Co, **21 Dec (CLH)**; **8, Alexander Co, 28 Dec** (KJM, CAT); 6, Du Page Co, **15 Dec (GAW)**; **5, Potomac (Vermilion Co), 14 Dec (SDB, SLD)**; **2, Ottawa (La Salle Co), 16 Dec-29 Feb** (CKM, JDM); 2, Clays Prairie (Edgar Co), **7 Dec (EWW)**; **2, Carroll Co, 18 Dec (KJM, LB)**; 2, Mercer Co, 21 Dec (KJM, TM); 2, LShel, 5 Jan (DMK, MFD); 2, Klehm Arboretum (Winnebago Co), 19 Jan-29 Feb (DTW, BCW). Additional maxima to 6 in the south, plus a few singles in north.

Song Sparrow

MC: **188**, UCCA, 29 Dec (KJM); 97, Champaign Co, 15 Dec (EJC, et al.); 73, Massac Co, 31 Dec (KJM); 34, Ark., 27 Dec (DMK); 33, Rock Island Co, 5 Jan (TM, WZ, m.ob.); 23, Mercer Co, 21 Dec (KJM, TM, m.ob.); 6, Du Page Co, 15 Dec (UWG).

Lincoln's Sparrow

Rock Island Co, **20 Dec** (*KJM)--the only report.

Swamp Sparrow

MC: **113**, UCCA, 29 Dec (KJM); **60**, Carl.L., 18 Dec (DMK); 32, Mermet J., 31 Dec (KJM); 24, Potomac (Vermilion Co), 14 Dec (SDB, SLD); 11, Merwin Nature Preserve (McLean Co), 17 Dec (MEF); 8, Port Louisa NWR, 21 Dec (KJM, TM); 5, Rock Island Co, 20 Dec (EAA, KJM); 4, Du Page Co, 15 Dec (GAW); 4, Whalon L FP (Will Co), 27 Dec (UWG). **Others** (central & north): 5, LShel, 5 Jan (DMK, MFD); Ottawa (La Salle Co), 6 Jan-29 Feb (CKM, JDM).

White-throated Sparrow

MC: **339**, UCCA, 29 Dec (KJM); **210**, Alexander Co, 28 Dec (KJM, CAT); 194, Massac Co, 31 Dec (KJM); 114, Champaign Co, 15 Dec

Savannah Sparrow in Lee County. 24 December 2007. Photo by Eric Walters.

(EJC, m.ob.); 24, Loud Thunder FP (Rock Island Co), 5 Jan (KJM, JDC, JAS); 22, Du Page Co, 15 Dec (UWG); 22, McDonough & Fulton Cos, 15 Dec (LLH).

Harris's Sparrow

Carl.L., 8-22 Dec (*DMK, KAM, TAM, m.ob.); Henderson Co, 15 Dec (DJM, MJM); imm., La Moille (Bureau Co), 12 Feb (MAM).

White-crowned Sparrow

MC: 78, Champaign Co, 15 Dec (SDB, GSL, et al.); 44, Massac Co, 31 Dec (KJM); 30, Carl.L., 13 Jan (DMK, MS); 25, Ark., 27 Dec (DMK); 14, McDonough & Fulton Cos, 15 Dec (LLH); 14, Mercer Co, 21 Dec (CM, JM, m.ob.); 11, LCal, 4 Dec (WJM); 9, Grundy Co, 23 Dec (DJS, TW).

Dark-eyed Junco

MC: 586, McDonough & Fulton Cos, 15 Dec (LLH); 533, Champaign Co, 15 Dec (EJC, m.ob.); 501, QC, 16 Dec (KR, CR, m.ob.); 382, Whiteside & Carroll Cos, 18 Dec (KJM, LB, m.ob.); 300, Carl.L., 18 Dec (DMK); 167, Perry & Randolph Cos, 27 Dec (KJM, RMR); 130, LShel, 5 Jan (DMK, MFD); 104, Massac Co, 31 Dec (KJM); 95, Du Page Co, 15 Dec (GAW). **'Oregon Junco'**: 2, Woodford Co, 1 Jan (*MEF, JMs).

Lapland Longspur

MC: **1500**, Carl.L., 1 Feb (DMK); **707**, Clinton L (DeWitt Co), 1 Jan (EJC); 500, LaSalle Co, 16 Jan (REF, et al.); 183, Pulaski Co, 28 Dec (JDC, JAS); 150, Kane Co, 26 Jan (KAM, MS); 130, McHenry Co, 19 Jan (EWW); 124, McDonough & Fulton Cos, 15 Dec (LLH); 62, Rock Island Co, 22 Dec (KJM, SBH); 58, Carroll Co, 18 Dec (KJM, LB, m.ob.); 50, LShel, 5 Jan (DMK, MFD). Reduced numbers over most of state.

Snow Bunting

MC: **1000**, Ogle & Stephenson Cos, 20 Jan (DTW, BCW); **486**, McDonough & Fulton Cos, 15 Dec (LLH); 321, Putnam Co, 16 Dec (CKM, JDM); 300, Baileyville (Ogle Co), 8 Dec (AS); 300, DeKalb & Kane Cos, 18 Feb (DJS); 235, McHenry Co, 19 Jan (EWW); 166, Whiteside & Carroll Cos, 18 Dec (KJM, LB, m.ob.); 115, Kankakee Co, 9 Feb (BRf); 100, Knox Co, 7 Dec (PR); 100, Lake Co, 29 Dec (RDH); 51, Rock Island Co, 20 Dec (KJM); 50, Winthrop H., 5 Dec (EWW); 35, Dunlap (Peoria Co), 8 Dec (TE); 30, Champaign (Champaign Co), 4 Feb (RD); 26, La Salle Co, 4 Jan (CKM, JDM); 25, Roscoe (Winnebago Co), 1 Jan (DTW, BCW); 18, Greene Valley FP (Du Page Co), 16 Dec (UWG); 17, Carlock (McLean Co), 10 Dec (MEF). **Others** (south): 2, Wisetown (Bond Co), 18 Dec (PWS, JS); 2, Carl.L., 18 Dec (VL, RMR, TH, JEM); Chauncey (Lawrence Co), 6 Dec (CLH). Largest numbers in over 20 years.

Common Redpoll at Morton Arboretum, DuPage County. Winter season 2007/2008. Photo by Paul Dacko.

Northern Cardinal

MC: 769, Rockfd, 15 Dec (DTW, BCW); 264, Mercer Co, 21 Dec (KJM, TM, m.ob.); 246, McDonough & Fulton Cos, 15 Dec (LLH); 226, Rock Island Co, 5 Jan (KJM, JDC, JAS, m.ob.); 120, Alexander Co, 28 Dec (KJM, CAT); 101, Du Page Co, 15 Dec (GAW); 80, Carl.L., 8 & 15 Dec (DMK); 80, Ark., 27 Dec (DMK); 80, LShel, 5 Jan (DMK, MFD).

Red-winged Blackbird

MC: 311,500, Rend L, 30 Dec (KAM, CJL); 22,563, Ark., 27 Dec (KJM, RMR); 16,000, Carl.L., 18 Feb (DMK); 1000, Spfld, 3 Jan (HDB, et al.); 793, QC, 16 Dec (KJM, SBH); 95, IBSP, 1 Jan (EWW); 50, Fulton Co, 9 Jan (LLH). **Others** (central & north): 2, LShel, 5 Jan (DMK, MFD); Champaign Co, 15 Dec (EJC). Notably few reports outside south.

Eastern Meadowlark

MC: 57, Wayne, Clay, & Jasper Cos, 8 Dec (EWW); 44, Pulaski Co, 27 Dec (JDC, JAS); 40, Carl.L., 9 Dec (DMK); 31, Mermet L, 31 Dec (KJM); 6, Rock Island Co, 5 Jan (*KJM, CM, JM, m.ob.); 6, L Bloomington (McLean Co), 3 Feb (MJW). **Others** (central & north): 4, Whiteside Co, 18 Dec (LB, *KJM); 3, La Salle L, 7 Jan (CKM, JDM); 2, DeKalb Co, 27 Dec (DJS); 2, LShel, 5 Jan (DMK, MFD); Mercer Co, 21 Dec (TM, *KJM).

Western Meadowlark

MC: 20, Carl.L., 24 Feb (DMK)—record high count for so. IL; 10, Santa Fe Bottoms (Clinton Co), 18 Feb (DMK). **Others:** Mermet L, 31 Dec (*KJM).

Rusty Blackbird

MC: 840, Mermet L, 31 Dec (KJM); 400, Carl.L., 13 Jan (DMK, MS); 200, Rend L, 30 Dec (KAM, CJL); 75, Crawford Co, 18 Feb (CLH); 9, Andalusia Slough (Rock Island Co), 22 Dec (KJM, SBH). **Others** (central & north): 2, Port Louisa NWR, 21 Dec (KJM); Ottawa (La Salle Co), 7 & 18 Dec (CKM, JDM); Champaign Co, 15 Dec (SDB, GSL); Jo Daviess Co, 24 Dec (EWW).

Brewer's Blackbird

MC: 300, Carl.L., 1 Dec (DMK). **Others:** 2 (1 ad. male, 1 imm. male), Shirland (Winnebago Co), 14-16 Dec (*DTW, RBt, JBt); 2, Mermet L, 31 Dec (*KJM); male, Hamilton Co, 9 Dec (EWW).

Common Grackle

MC: 407,450, Rend L, 30 Dec (KAM, CJL); 18,000, Carl.L., 2 Dec (DMK); 15,000, New Athens (St. Clair Co), 19 Jan (TJD); 13,725, Mermet L, 31 Dec (KJM); 306, QC, 16 Dec (KJM, SBH). **Others** (central & north): 4, Fulton Co, 9 Jan (LLH); 2, Champaign Co, 15 Dec (EJC). Weak numbers outside south.

Hoary Redpoll at Chicago Botanic Garden, Cook County. 20 January 2008. Photo by Greg Neise.

Brown-headed Cowbird

MC: 6000, Carl.L., 1 Jan (DMK, MS); 700, Grand Ridge (La Salle Co), 3 Feb (EWW); 520, Rend L, 30 Dec (KAM, CJL, MS); 350, Wauponsee (Grundy Co), 21 Dec (EWW); 350, Spfld, 3 Jan (HDB, et al.); 87, LCal, 29 Dec (WJM, MLB, CDH, WSS); 60, Fulton Co, 9 Jan (LLH); 40, Hampton (Rock Island Co), 14 Feb (KJM).

Purple Finch

MC: 145, Mercer Co, 21 Dec (KJM, TM); 34, UCCA, 29 Dec (KJM); 28, Carroll Co, 18 Dec (KJM, LB); 20, Du Page Co, 15 Dec (UWG); 20, White Pines SP (Ogle Co), 24 Dec (EWW); 19, Sand Ridge State Forest (Macon Co), all winter (RGB, SNB); 16, Monroe Co, 2 Jan (CD, PD). **Others:** 19, Green R WA (Lee Co), 26 Dec (KJM, JDS, m.ob.); 10, Potomac (Vermilion Co), 14 Dec (SDB, SLD); 7, Champaign Co, 15 Dec (EJC, et al.); 7 (1 male, 6 female), Table Grove (Fulton Co), 10 Feb (KAM); 5, Richland Co, 19 Jan (CLH); 5 (1 male, 4 female), Boone Co, 20 Jan (AEB). Widespread in good numbers, with 2-4 birds at additional scattered sites.

House Finch

MC: 120, Carl.L., 9 Dec (DMK); 116, Carroll Co, 25 Dec (EWW); 81, Rock Island Co, 5 Jan (TM, WZ, m.ob.); 80, LShel, 5 Jan (DMK, MFD); 55, Lost Nation (Ogle Co), 23 Dec (EWW); 45, Rantoul (Champaign Co), 12 Dec (SDB); 40, Union Co, 29 Dec (KJM); 30, Keithsburg (Mercer Co), 21 Dec (KJM, TM); 8, Du Page Co, 15 Dec (UWG). Poorly reported from eastern half of state.

Red Crossbill

MC: 11, Sand Ridge SF (Mason Co), 26 Dec (AF); 7, Boone Co, 4-6 Dec (AEB); 7, IBSP, 21 Jan (EWW); 3, Worden (Madison Co), 25 Jan (JI). **Others:** Mundelein (Lake Co) (female @ feeder), 2 Dec (EL); Washington Co CA (Washington Co), 20-21 Jan (DMK, MS, KAM, m.ob.).

White-winged Crossbill

30, Genoa (DeKalb Co), 7 Dec (KL).

Common Redpoll

MC: 150, Binnie FP (Kane Co), 25 Jan (JD); 100, CBG, 26 Jan & 2 Feb (UWG & SDB, SLD); 25, Chi, 26 Jan (KAM, MS, DBJ, APS); 21, Ottawa (La Salle Co), 4 Jan (CKM, JDM). **Others:** 16, River Forest (Cook Co), 27 Jan (JSA); 12, Grant Woods FP (Lake Co), 3 Dec (SDB); 12, Chi, 26 Jan (MD); 12, Half Day FP (Lake Co), 12 Feb (JB, m.ob.); 9, Naperville Twp (DuPage Co), 25 Jan (JAS); 7, Naperville (Will Co), 9 Dec (JS); 6, Kane Co, 26 Jan (KAM, MS); 3, Forreton (Ogle Co), 9 Dec (AS); 3, JP, 26 Dec (PRC); 2, Knox Co, 30 Dec & 12 Feb (PR, DJM); female, Carl.L., 18 Dec (TH); Mundelein (Lake Co), 5 Feb (SDB); New Athens (St. Clair Co), 27 Feb (TUM). One to several birds at many other additional sites in the northeastern corner of state. Largest numbers since 1993-1994. More photos on page 90.

HOARY REDPOLL

CBG, 19-28 Jan (SG, *DP, GN ph, m.ob. ph)..

Pine Siskin

MC: 125, Mundelein (Lake Co), 1 Dec (SDB, SLD); 89, Ottawa (La Salle Co), 2 Dec (CKM, JDM); 66, Clinton L, 1 Jan (GSL, BG); 28, Monroe Co, 2 Dec (CD, PD); 7, Carl.L., 9 Dec & 29 Feb (MS). **Others:** 61-63, Gurnee (Lake Co), 29 Dec-12 Feb (JSS); 32, Loud Thunder FP (Rock Island Co), 5 Jan (KJM, JDC, JAS); 27, Rockfd, 12 Jan (DTW, LGB); 24, Johnson Sauk Trail SP (Henry Co), 12 Dec (EWW); 20, Naperville (Will Co), 9 Dec (JS); 15, Lakewood FP (Lake Co), 3 Dec (SDB); 15, Palatine (Cook Co), 16 Dec (CF); 12, Evergreen L (McLean Co), 23 Feb (MJW); 8, Zion (Lake Co), 5 Jan (EWW); 6, Champaign Co, 15 Dec (EJC, et al.); Merrnet L, 31 Dec (KJM); Galesburg (Knox Co), 2 Jan (PR). Up to 4 birds at other scattered sites in north.

American Goldfinch

MC: 627, Rockfd, 15 Dec (DTW, BCW); 102, New Athens (St. Clair Co), 16 Feb (TUM); 90, LCal, 29 Dec (WJM, MLB, CDH, WSS); 89, Monroe Co, 13 Jan (CD, PD); 69, QC, 16 Dec (TM, BL, m.ob.); 45, LShel, 5 Jan (DMK, MFD); 43, Mercer Co, 21 Dec (CM, JM, m.ob.).

Evening Grosbeak

4, Binnie FP (Kane Co), 26 Jan (JD).

House Sparrow

MC: 793, Rock Island Co, 5 Jan (KJM, JDC, JAS, m.ob.); 451, Whiteside & Lec Cos, 26 Dec (SBH, m.ob.); 400, Carl.L., 13 Jan & 1 Feb (DMK, MS); 334, LCal, 29 Dec (WJM, MLB, CDH, WSS); 309, Chi, 18 Jan (GAW); 200, LShel, 5 Jan (DMK, MFD); 197, Mercer Co, 21 Dec (CM, JM, m.ob.); 160, St. Clair Co, 10 Dec (KAM).

Eurasian Tree Sparrow

Submission Information

✦ We welcome manuscripts, photographs, and illustrations for possible publication in *Meadowlark*.

✦ Article topics include unusual bird sightings and nesting accounts, technical papers on bird research, and other articles such as bird finding guides and field identification tips. Joy of birding articles will be considered.

✦ Manuscripts should be computer-generated, double spaced and printed on only one side of numbered pages. Please send two copies of your manuscript and make sure you keep another for yourself.

✦ We require a computer disc in Word or Word Perfect or an electronic file.

✦ We prefer digital or electronic files (200-300 dpi.) Clear black and white or color print photographs are also acceptable.

✦ Include name, address, and day and night time phone numbers. Other pertinent information about your qualifications and background is also helpful.

✦ We reserve the right to review and edit articles according to style, grammar, accuracy, and readability. Send articles, photographs, illustrations & inquiries to:

Sheryl De Vore, Chief Editor

Illinois Ornithological Society's

Annual Spring Birding Weekend

April 17th-19th

Loggerhead Shrike,

Greater Prairie-Chicken,

Yellow Rail, Smith's Longspur,

and more

in Marion and

Clinton counties.

Field trips include Carlyle Lake and Prairie Ridge Natural Area. We'll look for migrant waterfowl, shorebirds, and grassland birds including Smith's Longspur, Yellow Rail, Greater Prairie-Chicken and Loggerhead Shrike. After a day of birding, relax with friends at the historic Centralia House for the Saturday evening banquet. Raffle items: Bob Guge bird carving and Eagle Optics gift cards. Registration: \$70. Students: \$45. Includes field trips, continental breakfast and banquet dinner. Make your hotel reservations at Centralia's Bell Tower Inn for \$49.95/night (double occupancy).

For details and to register:
www.illinoisbirds.org

Profits from the raffle and registration fees will be used to fund the K.S. Research Grant Program benefiting birds in Illinois.
